- Recovers calculated data type.
- Recovers deleted records.
- Recovers linked table.
- Recovers password protected forms and modules with VBA Code.
- Recovers Report.
- Recovers Modules.
- Recovers Macros.

Stellar Phoenix Update Wizard

The Stellar Phoenix Update Wizard keeps your Stellar Phoenix applications updated. Update option in the application is capable of checking the latest updates. This will check for both latest minor and major version available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs.

To start Stellar Phoenix Update Wizard:

- On the Help menu, select Updates or click icon to start the Stellar Phoenix Update Wizard.
- 2. Stellar Phoenix Update Wizard window pops up. Click Next to proceed.
- 3. The wizard will start searching for the latest updates and if it finds any new version, a window pops up indicating the availability.
- 4. Click **Next**, the software will start downloading the update files from the server. When the process is complete, the software will upgrade to the latest version.

Live Update may not happen due to following reasons:

- Internet connection is not available
- There are no updates available from the update site

Note: If major version is available, to upgrade the software you have to purchase it.

System Requirements

These are the minimum system requirements to install Stellar Phoenix Access Repair software:

- Processor: Pentium Class
- Operating systems: Windows 2000 / XP / Vista / Windows 7
- **RAM:** 1 GB
- Hard Disk: 50 MB free space

Installation Procedure

Before installing the Stellar Phoenix Access Repair software ensure that your computer meets the minimum system requirements.

To install Stellar Phoenix Access Repair:

- 1. Double-click StellarPhoenixAccessRepair.exe file to start the setup process. The Setup Stellar Phoenix Access Repair dialog box opens. Click **Next**.
