

Stellar Audio Video Converter

Version - 2.0

User Guide

Overview

Stellar Audio Video Converter software is an optimized solution for the conversion of media files that supports various audio and video file formats. It enables you for the conversion of video to video, audio to audio and video to audio files so that they can be readily played on a range of audio players and portable devices like mobile phones, iPods, etc. Additionally you can enhance your videos with several built-in video editing tools like Color Effect, Adjust, Trim, Watermark and Crop.

The software allows you to preview converted media files before saving them in the computer.

Stellar Audio Video Converter supports conversion of audio and video files of almost all the popular types to audio/video files of type supported by almost all the players and devices.

Key Features of Stellar Audio Video Converter:

- User friendly GUI.
- Convert and Save Audio / Video file(s) to HD Video, Video, Devices and Audio format.
- Option to Crop video files.
- Option to Rotate and Flip video files.
- Option to Trim video files.
- Option to apply various color effects.
- Option to add Watermark text on video files.
- Support for popular audio/video file types for conversion.

Installation Procedure

Before installing the software, check that your system meets the minimum system requirements.

Minimum System Requirements:

- **Processor:** Pentium Class
- **Operating System:** Windows 10 / Windows 8.1 / Windows 8 / Windows 7
- **Memory:** Minimum 2 GB
- **Hard Disk:** 50 MB of Free Space

To install the software, follow these steps:

- Double-click **StellarAudioVideoConverter.exe** executable file to start installation. **Setup- Stellar Audio Video Converter** dialog box is displayed.
- Click **Next. License Agreement** dialog box is displayed.
- Choose **I accept the agreement** option. **Next** button will be enabled. Click **Next. Select Destination Location** dialog box is displayed.
- Click **Browse** to select the destination path where the setup files will be stored. Click **Next. Select Start Menu Folder** dialog box is displayed.
- Click **Browse** to provide path for program's shortcuts. Click **Next. Select Additional Tasks** dialog box is displayed.
- Choose the check boxes as per your choice. Click **Next. Ready to Install** dialog box is displayed.
- Review the entries. Click **Back** if you want to change them. Click **Install** to start installation. The Installing window shows the installation process.
- After completing the process, Completing the **Stellar Audio Video Converter Setup Wizard** window is displayed. Click **Finish**.

Note: Clear **Launch Stellar Audio Video Converter** check box before clicking **Finish** to prevent the software from launching.

Launching the Software

To launch Stellar Audio Video Converter in Windows 10:

- Click Start icon -> All apps -> **Stellar Audio Video Converter** -> **Stellar Audio Video Converters**.
Or,
- Double click **Stellar Audio Video Converter** icon on the desktop. Or,
- Click **Stellar Audio Video Converter** tile on the home screen.

To launch Stellar Audio Video Converter in Windows 8.1 / 8:

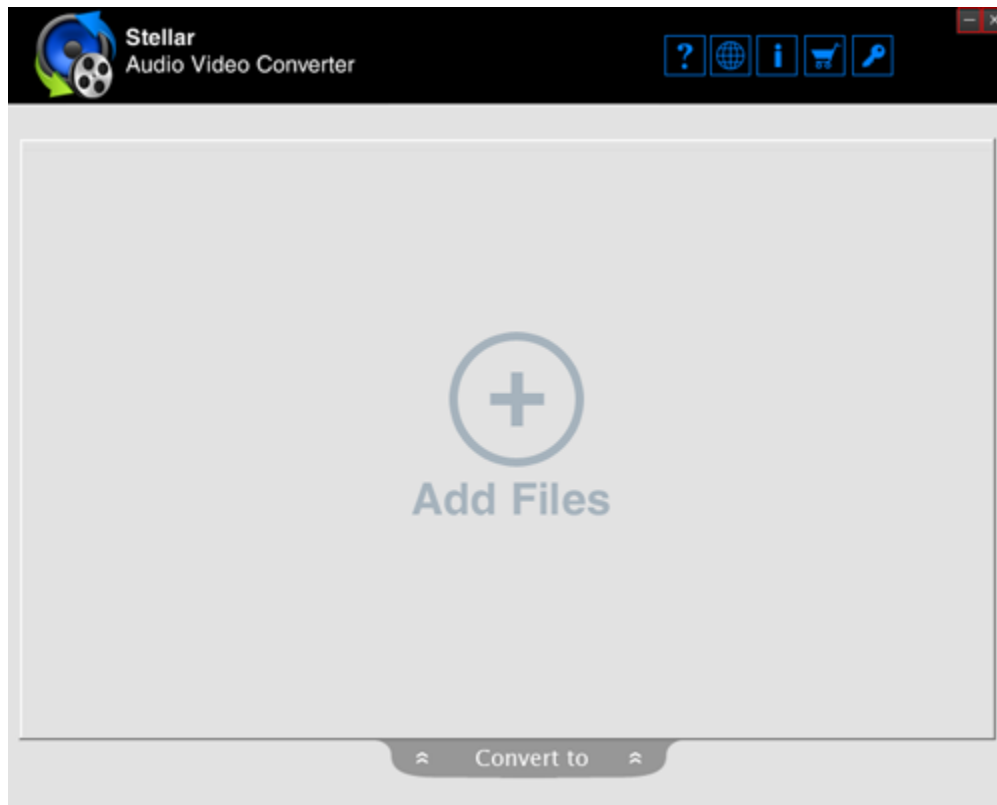

- Click **Stellar Audio Video Converter** tile on the home screen. Or,
- Double click **Stellar Audio Video Converter** icon on the desktop.

To launch Stellar Audio Video Converter in Windows 7:

- Click Start -> Programs -> **Stellar Audio Video Converter** -> **Stellar Audio Video Converter**. Or,
- Double click **Stellar Audio Video Converter** icon on the desktop. Or,
- Click **Stellar Audio Video Converter** icon in Quick Launch.

User Interface

Stellar Audio Video Converter software has a very easy to use Graphical User Interface. After launching the program, you will see the main user interface as shown below:

The user interface contains buttons that allows you to access various features of the software with ease.

Buttons

You will make use of the following buttons while using **Stellar Audio Video Converter**.

	Add File This button is provided on the home screen of Stellar Audio Video Converter . Click to add files in the list of Audio/Video files.
	Cancel Click this button to remove the changes.
	Remove File This button allows you to remove files from the list of Audio/Video files.
	Stop Click this button to stop the process. It is enabled only when a process is running.
	Apply Click this button to apply the settings.
	Reset All Click this button to reset the applied settings.
	Done Click this button to confirm/save the applied settings.
	Convert To Click this button to view the output formats for the conversion process.
	Save Click this button to save and convert Audio/Video files.

Ordering the Software

Click <http://www.stellarinfo.com/media-tools/video-converter.php> to know more about **Stellar Audio Video Converter**.

To purchase the software online, please visit <http://www.stellarinfo.com/media-tools/video-converter/buy-now.php>

Alternatively, click **Order** icon in **Help Menu** on **Menu Bar** to purchase the software online.

Select either of the methods given above to purchase the software.

Once the order is confirmed, a serial number will be sent to you through e-mail, which would be required to activate the software.

Registering the Software

The demo version of **Stellar Audio Video Converter** can be downloaded from the Stellar website. This demo version is just for evaluation purpose and must be eventually registered to use the full functionality of the software. Software can be registered after receiving the key.

To register the demo application, follow the steps given below:

1. Click on **Activation** button from the **Tools** menu bar. Activation dialog box is displayed.
2. If you have the registration key, select **I have a Registration Key** and click **OK**. **Stellar Audio Video Converter** dialog box is displayed.

3. Enter the **User Name**, **Activation Code** and then click **OK** to activate the software.
4. If you don't have the registration key, select **I do not have the registration key** and click **OK** to purchase the software online.

Note: *In case you are using Demo version of the software, you can save initial 60 seconds of audio/ video file. However, you can edit your video files in demo version of the software.*

Updating the Software

Stellar releases periodical software updates for **Stellar Audio Video Converter** software. You can update the software to keep it up-to-date. These updates can add a new functionality, feature, service, or any other information that can improve the software. Update option of the application is capable of checking for latest updates. This will check for both latest minor and major versions available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs. Note that demo version of the software cannot be updated.

To update Stellar Audio Video Converter:

- Click **Update Wizard** icon from **Setup** menu.
- **Stellar Phoenix Update Wizard** window opens. Click **Next**. The wizard will search for latest updates, and if it finds any new updates, a window will pop up indicating its availability.
- Click **Next** and the software will download the files from the update server. When the process is complete, the software will upgrade to the latest version.

Live Update may not happen due to following reasons:

- Internet connection failure
- Updates are not available

Note: *If a major version is available, you need to purchase the software in order to upgrade it.*

Add Files

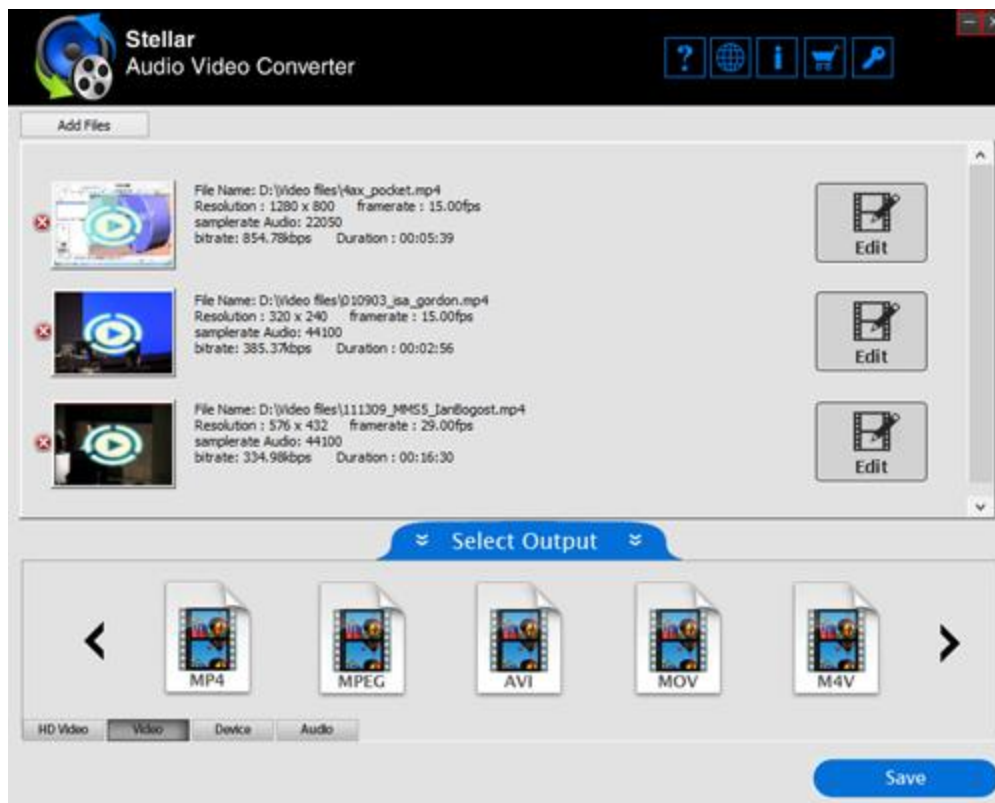

Stellar Audio Video Converter allows you to add single/multiple audio or video files for conversion at a single instance. You can also convert all the added audio or video files at once with a single click.

To add Audio/Video files:

1. Run **Stellar Audio Video Converter**.
2. On the main user interface, Click **[+]Add File** button.

3. An **Open** dialog box appears.
4. Select required file from the location and click **Open** button to open the file.
5. Once you have successfully added the file(s) to the application, you can preview, convert and save them in desired file format. You can also edit video files according to your requirements.
6. To remove a file from the list, click  button.

Convert and Save Files

Stellar Audio Video Converter provides you with the option to preview, convert and save audio/video file(s) to HD Video, Video, Devices and Audio format.

To convert and save file(s):

- Run **Stellar Audio Video Converter**.
- On the main user interface, Click **[+] Add File** button and add the required files for conversion.
- **Convert To** option at the bottom pane expands. Select a desired **Output Type** for conversion from the list as illustrated below:

Note: You can preview the added file(s) before initiating the conversion process, by clicking on the respective file from the list.

- Click **Save** button.
- In the *Select Output Folder* dialog that appears, select the location where you want to save the converted file(s). You can also create a new folder to save your file(s) by clicking on **New Folder** option.
- Click **OK** button to initiate the saving process.

- A progress bar indicates the conversion progress of the file. In case you want to stop the ongoing process, click **Stop** button.

- *List of Converted Files* dialog prompts. You can view the status of converted file(s) from the dialog.

Edit Video Files

Before conversion of a video file, the software provides you with several built-in video editing tools like Adjust, Trim, Color Effect, Crop and Watermark to enhance your video. You can perform the following listed features that are explained in detail at later stages of manual:

- Apply Color Effect on Videos
- Adjust Videos
- Trim Videos
- Apply Watermark on Videos
- Crop Videos

Apply Color Effect on Videos

The Color Effect option enables you to customize Video Settings by allowing you to set the brightness, contrast and saturation of the output files.

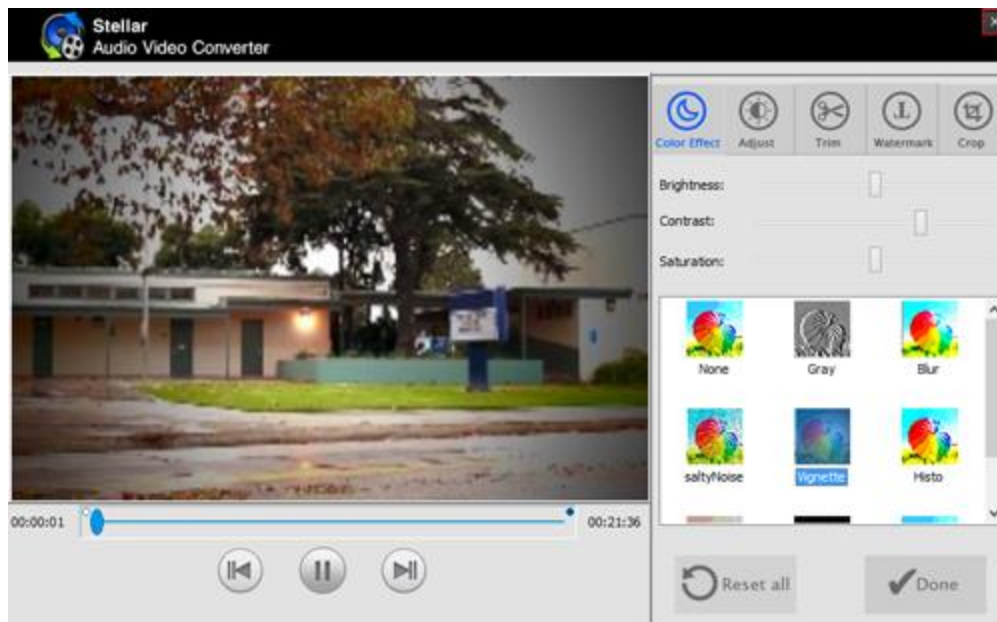

- **Brightness** effect adjusts the brightness of an entire clip. It makes the image brighter or darker by a specified amount. Brightness & Contrast effect is the easiest way to make simple adjustments to the tonal range of the image.
- **Contrast** is the separation between the darkest and brightest areas of the image. Increasing contrast makes an image look more vibrant while decreasing contrast can make an image look dull.
- **Saturation** is similar to contrast, however instead of increasing the separation between shadows and highlights, we increase the separation between colors. As a result, an increase in saturation results in an increase in contrast, brightness, and sharpness.

Color effects allow you to manipulate your video in various ways and are applied to an entire video clip. Color effect changes an element's appearance by applying special art effects that give your image the appearance of a sketch or create unique transformations using distortions and lighting effects.

To apply color effects on videos:

1. Select the video file on which you want to apply the color effects. Click **Edit** button.
2. Click on **Color Effect** tab.

3. Move the slider to set the desired **Brightness** / **Saturation** / **Contrast** as illustrated below:

4. To apply other effects, select the desired effect from the following list:

- None
- Grey
- Blur
- SaltyNoise
- Vignette
- Histo
- Sepia
- Negative
- Canny

5. In case you want to undo the changes, click **Reset All** button.

6. Click **Done** button to save the settings.

Adjust Videos

The Adjust option enables you to customize Video Settings by enabling you rotate and flip the output files.

To Rotate video:

Rotation effect is limited to adjustments to 90 degrees — right angles. Rotations can be made to the left or the right, i.e. clockwise or counter-clockwise.

1. Select the video file you want to rotate. Click **Edit** button.
2. Click on the **Adjust** tab.
3. To rotate the video clockwise, simply click on **Rotate**  button.
4. To rotate the video counter-clockwise, click on **Anti-Rotate**  button.
5. In case you want to undo the changes, click **Reset All** button.
6. Click **Done** button to save the settings.

To Flip video:

Horizontal Flip: This effect flips the video left to right.

Vertical Flip: This effect flips the video top to bottom.

1. Select the video file you want to flip. Click **Edit** button.
2. Click on the **Adjust** tab.
3. To flip the video horizontally, simply click on **Horizontal Flip**  tool.

4. To flip the video vertically, click on **Vertical Flip**  tool.
5. In case you want to undo the changes, click **Reset All** button.
6. Click **Done** button to save the settings.

Note: *Edit option is available only for video files. You cannot edit audio files.*

Trim Videos

Trim tool allows you to view the desired part of a video by trimming unwanted sections from it. You can trim either from the beginning or ending point of a video, such that the resulting movie shows only the part of the video you want. The start trim point determines when the clip will begin to play, and the end trim point determines when the clip will stop playing.

Note that while you trim a clip, the trimmed part of the clip is not removed from the source file rather it gets hidden so that it doesn't appear in your project.

To trim a video:

1. Select the video file you want to trim. Click **Edit** button.
2. Click on the **Trim** tab.
3. Move the slider to set the start and end points to frame the section of your video clip.

4. Click **Apply** to save the settings.
5. In case you want to undo the changes, click **Cancel/Reset All** button.
6. Click **Done** button to proceed.

Note: You can use *Trim* option in full version.

Apply Watermark on Videos

Watermark tool allows you to load text in digital media such as video or images. It enables you to stamp a personalized identification mark as text on video file(s).

To apply watermark on videos:

1. Select the video file on which you want to add watermark. Click **Edit** button.
2. Click the **Watermark** tab.
3. Enter the text in the given text box which you want as watermark.
4. You can choose the font color after you click on **Load Text** button. Click **OK**.
5. You can choose to set the position of the text from the available options in the drop down list.
6. After you have specified the text and its position, click on **Apply** button.

7. In case you want to undo the changes, click **Cancel/ Reset All** button.

- When you have finished the customization of video watermark, click **Done** to proceed.

Crop Videos

The Crop tool allows you to select an area of an image and discard everything outside this area. This tool is often used to remove borders, or to eliminate unwanted areas to provide you with a more focused working area. It is also useful if you need a specific image size that does not match the original dimensions of your image.

To Crop video:

- Select the video file you want to crop. Click **Edit** button.
- Click on the **Crop** tab.
- Set the value of each attribute to crop your video to the exact dimensions you desire.

- When the effect of the output file meets your need, click **Apply** to enable the settings.
- In case you want to undo the changes, click **Cancel/Reset All** button.
- Click **Done** button to save the settings.

Supported File Formats

Stellar Audio Video Converter software supports a wide range of audio and video files. All the supported files under different formats are given below:

HD VIDEO FILE FORMATS	MP4			
	MPEG			
	MOV

FAQs

1. What does demo version of the software do?

Demo version of the software allows you to save initial 60 seconds of audio/ video file. To convert complete audio/ video file, you need to purchase and register the software. However, you can edit your video file(s) in demo version of the software.

2. How much time will the software take to convert the files?

The time taken for converting the audio/ video files is dependent on the size and number of files selected.

3. Can I convert multiple audio/video files simultaneously?

Yes, the software allows you to convert multiple files at a single instance. To know more, please refer to Convert and Save Files topic of this help manual.

4. Does Stellar Audio Video Converter makes any change to my original Video file after editing?

No, the application saves the converted audio/ video file(s) to the location selected by the user. Original audio/ video file is kept as it is.

5. Can I convert video file format to an audio file format?

Yes, the software provides you with an option to convert video files into various audio file formats.
