

Stellar Phoenix Database Repair for Oracle 4.0

Installation Guide

Overview

Stellar Phoenix Database Repair for Oracle repairs data from damaged and corrupt Oracle 10g/11g/12c databases. Using strong algorithm, the software performs a complete scan of the corrupt Oracle database and efficiently repairs almost every bit of information without deleting or modifying original data. Finally it restores repaired data to a new blank database, created by the user before initiating repairing process.

Even heavily damaged database can be optimally repaired and restored by this software.

Oracle 10g/11g/12c should be installed on the computer for successfully repairing database using **Stellar Phoenix Database Repair for Oracle**.

After scanning, **Stellar Phoenix Database Repair for Oracle** shows the original contents of the selected database.

What's new in this version?

- Supports Oracle 12c Release 1.
- Supports XML data type Table.
- Supports Windows 10 / Windows 8.
- Repairs Deleted records of Tables.

Key Features

- Repairs corrupt Oracle database.
- Preview of contents of databases.
- Supports Oracle 10g/11g/12c.
- Repairs Index Organized Table (simple IOT).
- Repairs Index Organized Table (Use Overflow Data Segment).
- Repairs Nested Object type.
- Repairs Table with Object type.
- Repairs Table with Array type.
- Repairs Nested Table.
- Repairs role privilege for user.
- Repairs system privilege for user.
- Repairs object privilege for user.
- Repairs role privilege for role.
- Repairs system privilege for role.
- Repairs object privilege for role.
- Repairs materialized view.
- Repairs materialized view log.

- Repairs database link.
- Supports XML Schema URL.
- Supports XML table.
- Repairs XML type Views.
- Repairs XML indexes.
- Repairs tables, views, table space.
- Repairs clusters and cluster tables.
- Repairs triggers, schemas, synonyms, roles, index, sequence.
- Repairs primary and foreign key associated with tables.
- Repairs user-defined data functions and stored procedures.
- Repairs queries of database links in .txt file.
- Allows you to store queries of objects such as, views, procedures and triggers in .txt file.
- Allows you to store queries of functions, package and package body in .txt file.
- Repairs packages, packages body.
- Manual selection of databases.

Limitations of Stellar Phoenix Database Repair for Oracle

- Tables present in SYS schema are not repaired.
- Compression Table & Encryption Table are not repaired.
- User login password is not repaired.
- Materialized view created using database link is not repaired.
- Xml complex nested schema and based tables are not repaired.
- Nested Array type table is not repaired.
- Drop and truncated table data is not repaired.

Why Stellar Phoenix Database Repair for Oracle?

Stellar Phoenix Database Repair for Oracle has many advanced functionalities added to it. It has a easy-to-use user interface which enables even the naive users to operate the application. The application incorporates a unique and useful feature to search for databases saved in the system if the database path is not known. A preview of the corrupt database is also shown before repair process.

Repair Oracle Database

Stellar Phoenix Database Repair for Oracle is capable of repairing all the lost items of the corrupt Oracle database. The tool repairs corrupt database and saves the repaired data in a blank database created by user. The original database is left as it is.

Scan Deleted Records of Tables

Stellar Phoenix Database Repair for Oracle software gives an option to scan the deleted records of tables present in the database and repairs them.

Search Database

Stellar Phoenix Database Repair for Oracle software gives an option to search a drive volume to find out the available databases. All the databases available in that drive are shown. Any of the found databases can be selected for repairing. Searched databases are shown in a tabular form with all their details like creation date, modification date and size. These details help in locating the right database, if there are multiple databases created with same name.

Preview Database

Stellar Phoenix Database Repair for Oracle gives an option to preview the corrupt database before repairing it. Preview of the database shows the tables, constraints, schemas stored in the database. There is also an useful 'find' option given in the application to search for items in database shown in the preview window. User can analyze the database preview and start the repairing after being satisfied with the preview. Oracle software is not needed to be installed for previewing the database but Oracle must be installed for repairing the database.

Installation Procedure

Before installing the **Stellar Phoenix Database Repair for Oracle** software ensure that your computer meets the minimum system requirements and other prerequisites.

Minimum System Requirements

- **Processor:** Pentium Class
- **Operating System:** Windows 10 / 8.1 / 8 / 7
- **Memory:** Minimum 4 GB
- **Hard Disk:** 50 MB of Free Space
- **Oracle:** Oracle 10g/11g/12c

To install the software:

1. Double-click **StellarPhoenixDatabaseRepairforOracle.exe** file and click **Run** to start *Setup Wizard*. *Setup - Stellar Phoenix Database Repair for Oracle* dialog box is displayed.
2. Click **Next**. License Agreement dialog box is displayed.
3. Select *I accept the agreement* option. Click **Next**. *Select Destination Location* dialog box is displayed.
4. Specify a destination in the text box or click **Browse** to select a destination. Click **Next**. *Select Start Menu folder* dialog box is displayed.
5. Specify a destination in the text box or click **Browse** to select a destination. Click **Next**. *Select Additional Tasks* dialog box is displayed.
6. Select the required check boxes for creating desktop icon and quick launch icon of the software. Click **Next**.
7. In the *Ready to Install* dialog box, verify the settings. Click **Back** to make any changes, or click **Install** to install the software.
8. After successful installation, the *Completing the Stellar Phoenix Database Repair for Oracle Setup Wizard* screen opens. Click **Finish**.

Launching the Software

To launch Stellar Phoenix Database Repair for Oracle in Windows 10:

- Click Start icon -> All apps -> **Stellar Phoenix Database Repair for Oracle** -> **Stellar Phoenix Database Repair for Oracle** Or,
- Double click **Stellar Phoenix Database Repair for Oracle** icon on the desktop. Or,
- Click **Stellar Phoenix Database Repair for Oracle** tile on the home screen.

To launch Stellar Phoenix Database Repair for Oracle in Windows 8.1 / 8:

- Click **Stellar Phoenix Database Repair for Oracle** tile on the home screen. Or,
- Double click **Stellar Phoenix Database Repair for Oracle** icon on the desktop.

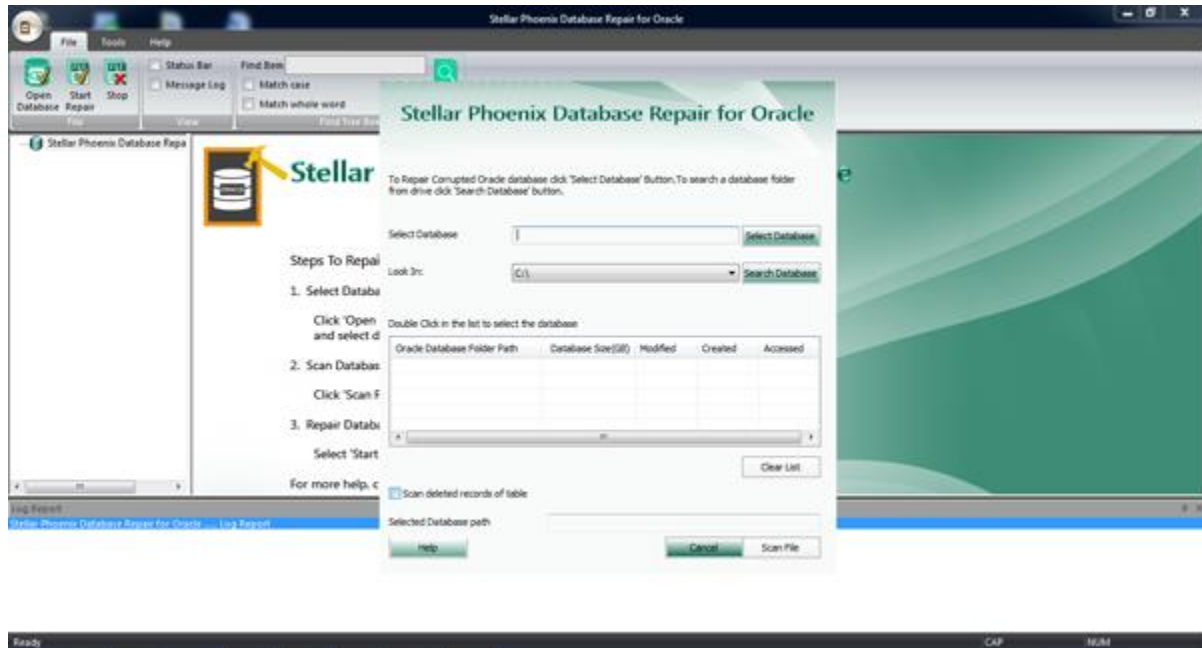

To launch Stellar Phoenix Database Repair for Oracle in Windows 7:

- Click Start -> Programs -> **Stellar Phoenix Database Repair for Oracle** -> **Stellar Phoenix Database Repair for Oracle**. Or,
- Double click **Stellar Phoenix Database Repair for Oracle** icon on the desktop. Or,
- Click **Stellar Phoenix Database Repair for Oracle** icon in Quick Launch.

User Interface

Stellar Phoenix Database Repair for Oracle software has a very easy to use Graphical User Interface. The user interface contains features required for repairing data from damaged and corrupt Oracle 10g/11g/12c databases.

After launching the program, you will see the main user interface as shown below:

The user interface contains Menus and Buttons that let you access various features of the software with ease.

Help

To open user guide of the **Stellar Phoenix Database Repair for Oracle** software.

Ordering the Software

Click <https://www.stellarinfo.com/database-recovery/oracle-recovery.php> to know more about **Stellar Phoenix Database Repair for Oracle**.

To purchase the software online, please visit <https://www.stellarinfo.com/database-recovery/oracle-recovery/buy-now.php>

Alternatively, click on **Purchase** icon in **Help Menu** on **Menu Bar** to purchase the software online.

Select either of the methods given above to purchase the software.

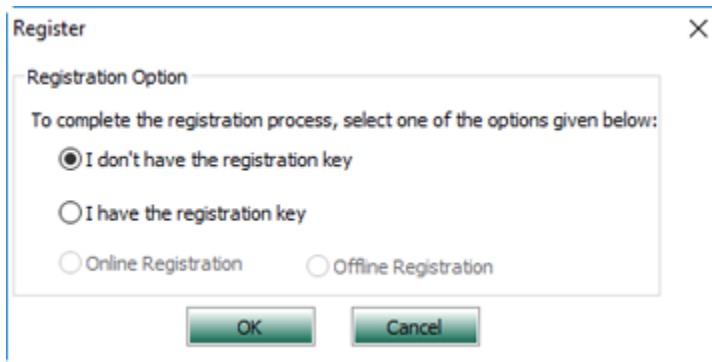

Once the order is confirmed, a serial number will be sent to you through e-mail, which would be required to activate the software.

Registering the Software

The demo version is just for evaluation purpose and must be eventually registered to use the full functionality of the software. The software can be registered using the Registration Key which you will receive via email after purchasing the software.

To register the software:

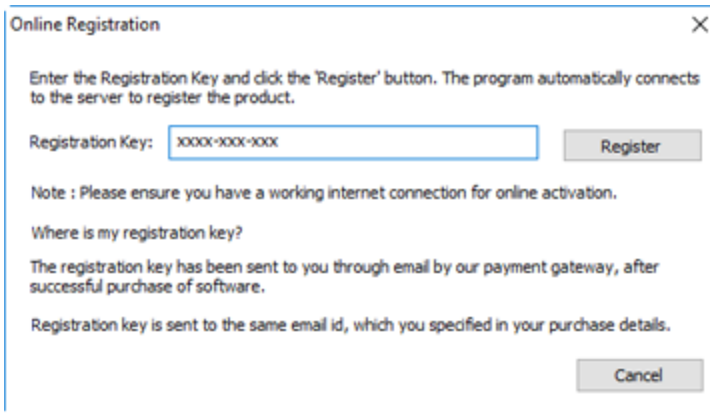

1. Run demo version of **Stellar Phoenix Database Repair for Oracle** software.
2. On **Tools** menu, click **Register** option. *Register* window is displayed as shown below.

3. Choose 'I don't have the registration key' (Use this option if you have not purchased the product) or select 'I have the registration key' (Use this option if you have already purchased the product).

To register the software, when you do not have a registration key, follow the steps given below:

1. In the *Register* window, select '**I don't have the registration key**' option. Click **OK**, to go online and purchase the product.
2. Once the order is confirmed, a Registration Key will be sent to the email provided at the time of purchase.
3. In the *Online Registration* window, type the **Registration Key** and click **Register** button (Please ensure that you have an active Internet connection).

4. ' *Activation Completed Successfully* ' message is displayed after the process is completed successfully. Click **OK**.

To register the software, when you have a key, follow the steps given below:

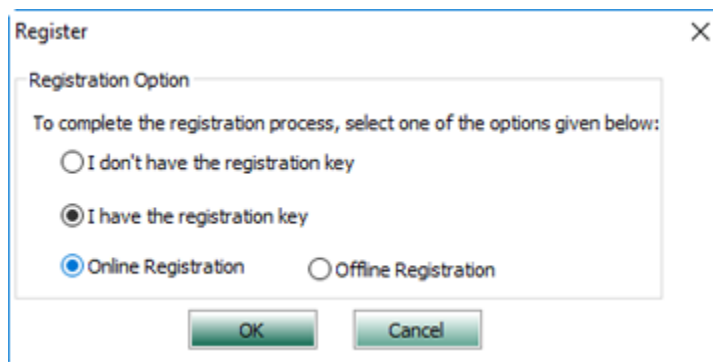

1. In the *Register* window, select '**I have the registration key**' option.
2. You can choose either 'Online Registration' (Use this option to register the software over Internet) or 'Offline Registration' (Use this option to register the software manually / through e-mail if for any reason, Internet connection is unavailable).

- **Online Registration**

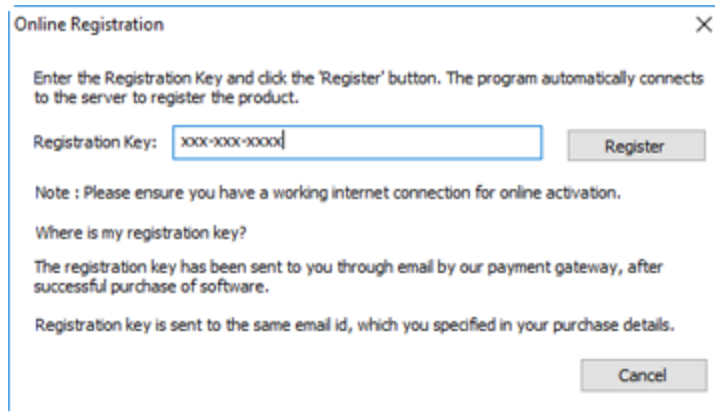

Online Registration is possible only when an active Internet connection is available.

- **To register the software online:**

1. From the *Register* window, select **Online Registration**. Click **OK**.

2. An **Online Registration** dialog box will appear.
3. Type the **Registration Key** (received through email after purchasing the product) in the field of Registration Key. Click **Register**.

Online Registration

Enter the Registration Key and click the 'Register' button. The program automatically connects to the server to register the product.

Registration Key:

Note : Please ensure you have a working internet connection for online activation.

Where is my registration key?

The registration key has been sent to you through email by our payment gateway, after successful purchase of software.

Registration key is sent to the same email id, which you specified in your purchase details.

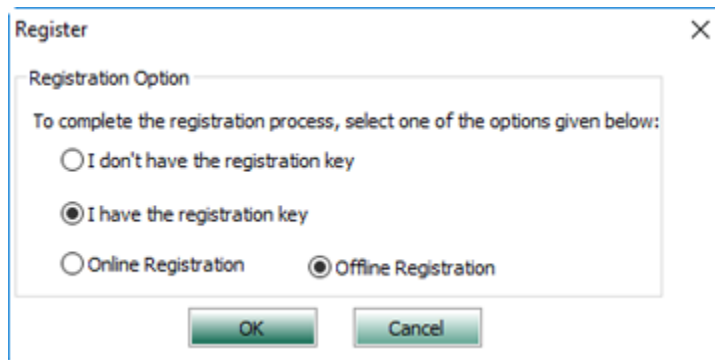

4. The software would automatically communicate with the license server to verify the entered key. If the key you entered is valid, software will be registered successfully.

- **Offline Registration**

Offline Registration enables you to register the product when your computer does not have an Internet connection.

- **To register the software offline:**

1. From the *Register* window, select **Offline Registration**. Click **OK**.

Register

Registration Option

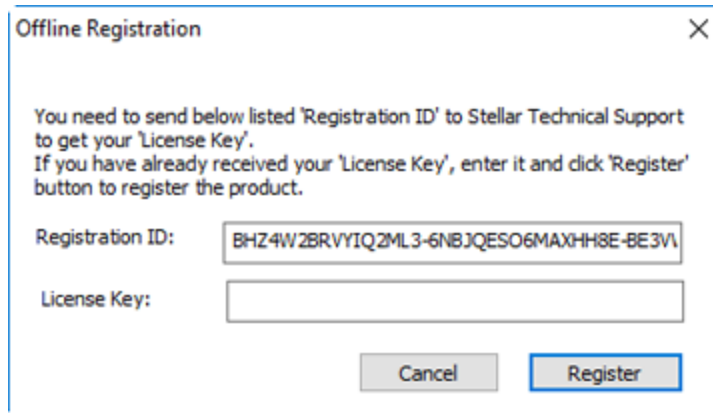

To complete the registration process, select one of the options given below:

☐ I don't have the registration key

☒ I have the registration key

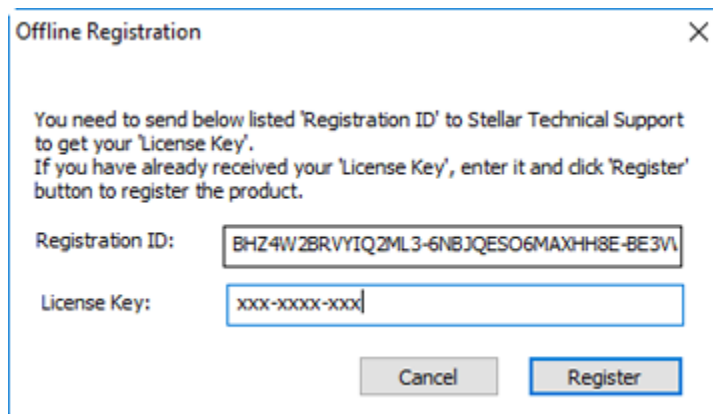

☐ Online Registration ☒ Offline Registration

2. An **Offline Registration** dialog box will appear displaying **Registration ID** in its respective field.

The dialog box is titled "Offline Registration" and contains the following text: "You need to send below listed 'Registration ID' to Stellar Technical Support to get your 'License Key'. If you have already received your 'License Key', enter it and click 'Register' button to register the product." Below the text are two input fields: "Registration ID:" with the value "BHZ4W2BRVYIQ2ML3-6NBJQESO6MAXHH8E-BE3V\\" and "License Key:" which is empty. At the bottom are "Cancel" and "Register" buttons.

3. To get your License Key, which is required to register the software manually, you need to mail the listed **Registration ID** to support@stellarinfo.com.
4. A License Key will be sent to your email address after verifying the Registration ID and purchase details by *Stellar Technical Support*.
5. After receiving the License Key, open **Stellar Phoenix Database Repair for Oracle**. In *Register* window, select '**I have the registration key**'.
6. Select **Offline Registration** and click **OK**.
7. Enter the **License Key** received through email in the field of License Key.

This dialog box is identical to the one above, but the "License Key:" field now contains the text "xxx-xxxx-xxx".

8. Click **Register** to activate the software. A confirmation message is displayed if a valid key is entered. Click **OK**.

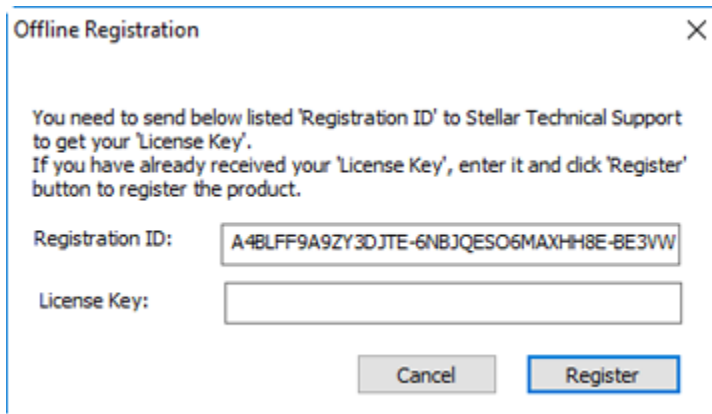

Transfer License

Stellar Phoenix Database Repair for Oracle allows you to transfer the license of the registered software to another computer on which you want to run the software with full functionality. This operation deactivates the product on your current computer so it can be reactivated on the new computer.

To transfer a software license from one computer to another, please follow the specific steps below:

On Target Computer:

1. Run demo version of the software.
2. In **Tools** Menu on Menu Bar, click **Register**. A new dialog appears.
3. From the *Register* window, select **Offline Registration**. Click **OK**.
4. An **Offline Registration** dialog box will appear displaying **Registration ID** in its respective field.

Offline Registration

You need to send below listed 'Registration ID' to Stellar Technical Support to get your 'License Key'.
If you have already received your 'License Key', enter it and click 'Register' button to register the product.

Registration ID: A4BLFF9A9ZY3DJTE-6NBJQESO6MAXHH8E-BE3VW

License Key:

Cancel Register

On Source Computer:

1. Run registered version of **Stellar Phoenix Database Repair for Oracle** software.
2. In **Tools** Menu on Menu Bar, click **Transfer License**.

Transfer License

To transfer the license of the program, copy the Registration ID from the target computer and paste it below. Click on "Transfer In" to generate a License Key which needs to be pasted in target computer.

Registration ID:

License Key:

[Click here to know the steps of transferring license to another computer.](#)

3. Copy the **Registration ID** displayed on the Target Computer in the field of Registration ID on the Source Computer.
4. To get your License Key, click **Transfer In** button on Source Computer. This will generate a License Key.

Transfer License

To transfer the license of the program, copy the Registration ID from the target computer and paste it below. Click on "Transfer In" to generate a License Key which needs to be pasted in target computer.

Registration ID:

License Key:

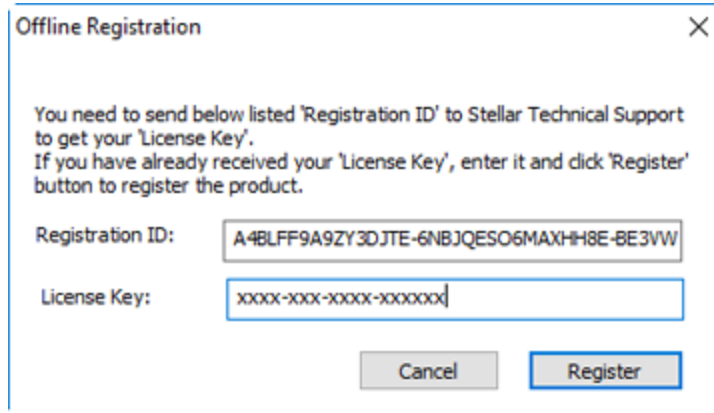

[Click here to know the steps of transferring license to another computer.](#)

5. You can also save the License Key generated on the source computer. Click **Save to File** button to save the Registration ID and the License Key. In **Browse for Folder** dialog box, select the location where you want to save the details. Click **OK**.
6. ' *License Key has been saved successfully* ' message is displayed after the saving process is completed successfully. Click **OK**.

This will deactivate the product on Source Computer and you will no longer be able to use the software anymore on this computer.

On Target Computer:

1. Type the **License Key** which you have generated on the Source Computer in the provided field of License Key.

The image shows a dialog box titled "Offline Registration" with a close button (X) in the top right corner. The text inside the dialog box reads: "You need to send below listed 'Registration ID' to Stellar Technical Support to get your 'License Key'. If you have already received your 'License Key', enter it and click 'Register' button to register the product." Below the text, there are two input fields. The first field is labeled "Registration ID:" and contains the text "A4BLFF9A9ZY3DJTE-6NB3QESO6MAXHH8E-BE3VW". The second field is labeled "License Key:" and contains the text "xxxx-xxx-xxxx-xxxxxx". At the bottom of the dialog box, there are two buttons: "Cancel" and "Register".

Offline Registration

You need to send below listed 'Registration ID' to Stellar Technical Support to get your 'License Key'.
If you have already received your 'License Key', enter it and click 'Register' button to register the product.

Registration ID: A4BLFF9A9ZY3DJTE-6NB3QESO6MAXHH8E-BE3VW

License Key: xxxx-xxx-xxxx-xxxxxx

Cancel Register

2. Click **Register** to complete the activation process.
3. ' *Activation Completed Successfully* ' message is displayed after the process is completed successfully. Click **OK**.

Updating the Software

Stellar Phoenix Update Wizard helps you in keeping your application updated. Update option in the application is capable of checking and installing the latest updates. The wizard checks for latest minor and major versions available online. Minor version can be easily downloaded through the update wizard. However, the major version available has to be purchased.

If updates are available for the product, update wizard pops up while you are running **Stellar Phoenix Database Repair for Oracle**. While updating the software, it is recommended to close all the running programs.

To update **Stellar Phoenix Database Repair for Oracle**, do one of the following:

- Click on update button in application tool bar. 'Update Wizard' dialog box is displayed.
- Click Next. A busy timer shows that updates are being searched. If it finds any new version, a message indicates the availability. The software will start downloading the updated files from the server. When the process is complete, the software will upgrade to the latest version.
- In case, a message is displayed that all latest updates has installed, click Cancel to close the wizard.

Note: Demo version of the software cannot be updated.
