Order and Register

You can purchase the software online. For price details and to place an order, click [here](#).

On confirmation of order, a pre-paid serial number is sent to you through e-mail that would be required to register the software.

Register Stellar Phoenix PowerPoint Repair:

After receiving the **Registration Key**, the software can be activated.

To register the software:

1. Run demo version of the software.
2. Select **Activate Stellar Phoenix PowerPoint Repair** in **Help** menu.
3. Type Name and Key. Click **OK**.

How to Update?

There are periodical software updates for **Stellar Phoenix PowerPoint Repair**. Software updates should be done to keep the software up-to-date. Updates can be a newly added functionality, a new feature, a new service or any other information that can be important for improvement. Update option in the application is capable of checking for the latest updates. This checks for both latest minor and major version available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs. Note that demo version can not be updated.

To update the application, follow these steps:

- Click on **Update**  button in application tool bar or select **Updates** option in **Help** menu. **Stellar Phoenix Update Wizard** is displayed.
- Click **Next**. A busy timer shows that updates are being searched. If it finds any new version, a message indicates the availability.
- If no updates are available, click **Cancel** to close the wizard.
- Click **Next**. The software will start downloading the update files from the server. When the process is complete, the software will upgrade to the latest version.

How to Uninstall the Software?

Stellar Phoenix PowerPoint Repair can be removed either using **Uninstall Stellar Phoenix PowerPoint Repair** program in the software or from **Add/Remove** programs in **Control Panel**.

To uninstall the application using Uninstall Stellar Phoenix PowerPoint Repair:

Click **Start -> All Programs -> Stellar Phoenix PowerPoint Repair -> Uninstall Stellar Phoenix PowerPoint Repair**. Follow on screen instructions to completely remove the software, including registry entries from your computer.

To uninstall the application using Control Panel:

Click **Start -> Control Panel -> Add Or remove Program**. Select **Stellar Phoenix PowerPoint Repair** entry from the displayed list and click **Change/Remove**. Follow on screen instructions to completely remove the software as well as registry entries from your computer.

Add Files

To start the repairing process, you need to add files to the **Stellar Phoenix PowerPoint Repair** software. You can add a single file or multiple files to the software. In addition, you can specify a folder or a volume from which all PowerPoint files can be added.

To add file to Stellar Phoenix PowerPoint Repair,

Run **Stellar Phoenix PowerPoint Repair** software. **Stellar Phoenix PowerPoint Repair** dialog box opens as shown below:

You can also open this dialog box by

- Choosing **Add File(s) to Tree View** option in **File** menu.
- Clicking **Add File(s) to Tree View**  button on the tool bar.

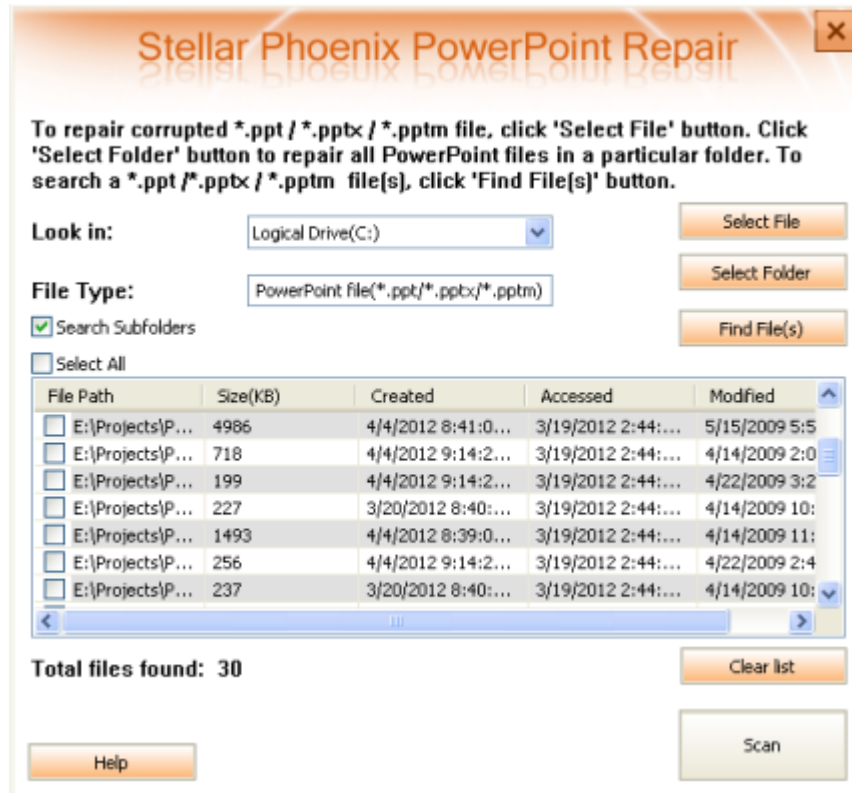

To add a single file:

- In the **Stellar Phoenix PowerPoint Repair** dialog box, click **Select File**.

- In the **Open** dialog box, locate and select the required PowerPoint file. Click **Open**.
- The path of the selected file is displayed in **Select File Path** text box.
- Scan button will be enabled and you can start the scanning process.

To add multiple files:

1. In the **Stellar Phoenix PowerPoint Repair** dialog box, click **Select Folder**.
2. In the **Browse for Folder** dialog box, browse and select the required Folder. You can also select a volume. Select folder or volume. Click **OK**.
3. All files found in the selected folder or volume are listed in **Stellar Phoenix PowerPoint Repair** dialog box as shown here:

4. Check the check boxes of files that are to be repaired.
5. Scan button will be enabled and you can start the scanning process.

Find Files

Stellar Phoenix PowerPoint Repair gives you option to search for Microsoft PowerPoint files in your computer in case you are unaware of the exact location of required files. You can locate required files in your computer very easily using Find File(s) option of the software. You can search for files in drives and sub folders. However, you can select only one drive at a time to search for files.

To find Microsoft PowerPoint files:

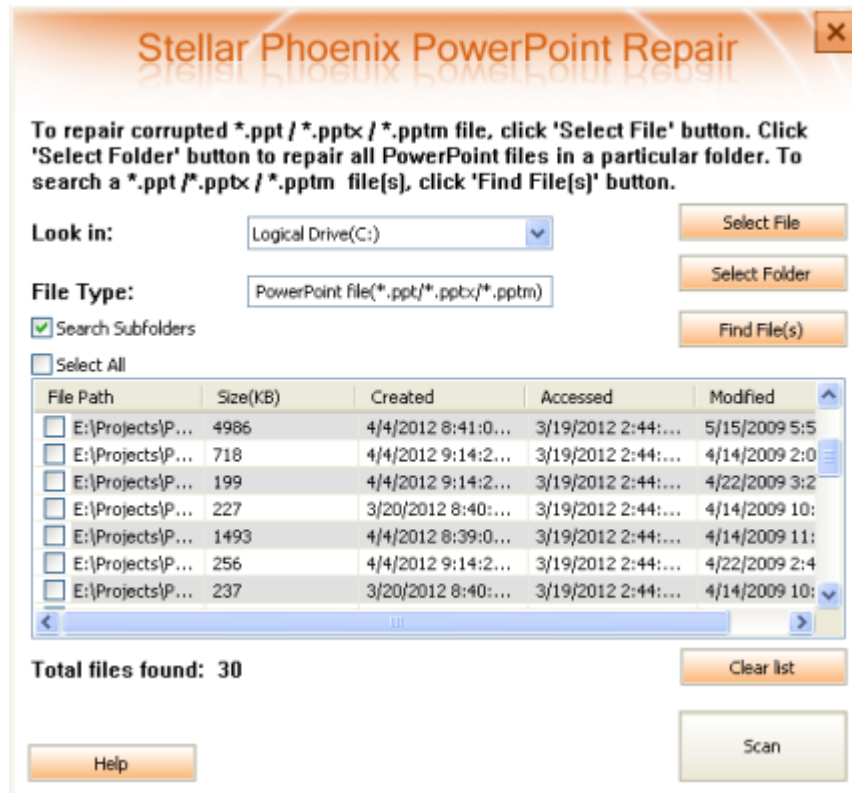

Run **Stellar Phoenix PowerPoint Repair** software. **Stellar Phoenix PowerPoint Repair** dialog box opens as shown below:

You can also open this dialog box by

- Choosing **Add File(s) to Tree View** option in **File** menu.
- Clicking **Add File(s) to Tree View**  icon on the tool bar.

To search for PowerPoint files,

- In the **Stellar Phoenix PowerPoint Repair** dialog box, specify drive to be searched for in **Look in** listbox.
- Click **Find File(s)** button.
- The software starts searching for PowerPoint files in the specified drive and after finishing the search, displays list of found files as shown below:

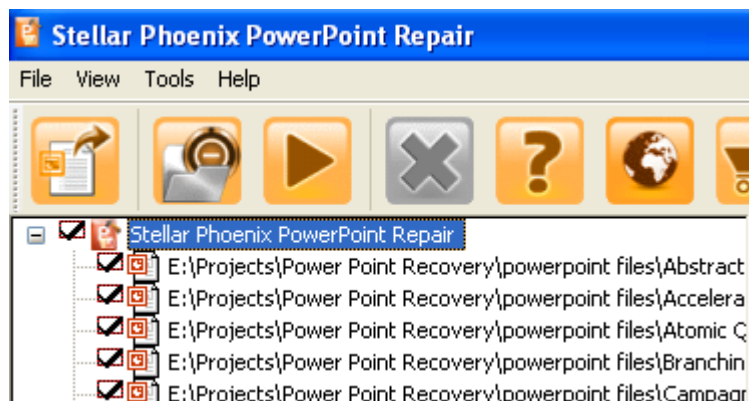

Select file you wish to repair from this list and click Scan button to start the scanning process.

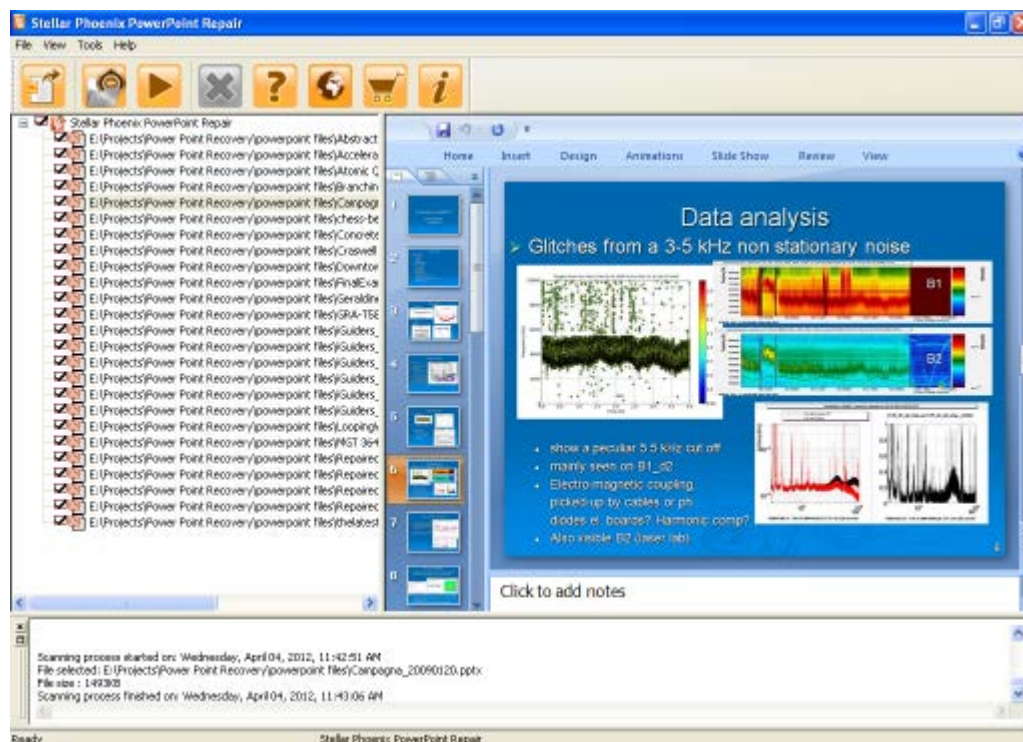

You can click **Clear List** button to clear result of search process and start a new search process.

View Preview

After scanning, **Stellar Phoenix PowerPoint Repair** shows list of scanned files in a tree like structure under **Stellar Phoenix PowerPoint Repair** node in left pane of the application window as shown here:

To preview a file, click on it in the left pane. File's preview will be displayed in the right pane of the application window.

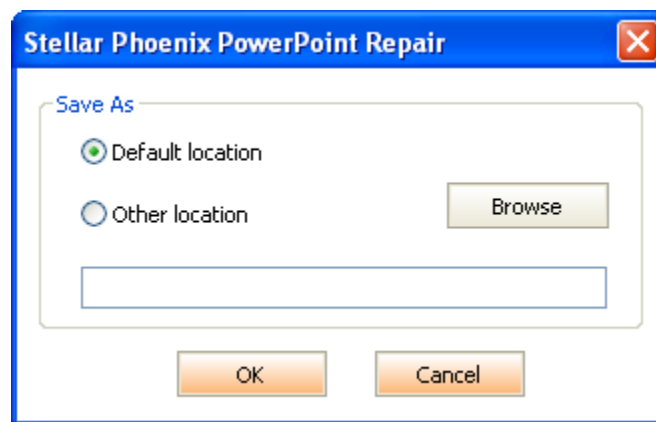

Repair Files

Stellar Phoenix PowerPoint Repair repairs Microsoft PowerPoint files and allows you to save files at your preferred location. You can repair individual or multiple files using the software.

To repair Microsoft PowerPoint files, follow the steps given below:

1. [Add File\(s\)](#) to the software and start scanning process.
2. After scanning is finished, scanned files are listed in the left pane in a tree view. Check the checkboxes of files that are to be repaired. Click **Start**  button on the tool bar or select **Start Repair** option in **File** menu. A dialog box to select location for saving repaired files appears as given below:

3. To save repaired files at their default location, select **Default location** option and click **OK**.
4. To save repaired files at a location of your choice, select **Other location** option and click **Browse** button. In **Browse for Folder** dialog box, specify the location and click **OK**. Click **OK** in location dialog box.
5. All selected files are saved at the specified location and following message appears:

If you are not satisfied with the outcome of normal repair, you can select **Raw Recovery** option in **Tools** menu for advance repairing. **Raw Recovery** works only for .ppt files.

Remove Files

You can remove files from the **Stellar Phoenix PowerPoint Repair** [node in preview window](#). If for some reason, you decide that some added files are not required then you can remove these files without exiting the software.

To remove files:

1. Check check box of the file that needs to be removed from the tree.
2. Click  button on the tool bar or select **Remove File(s) from Tree** option in **File** menu. All selected files will be removed.

By default, all files are checked when you add files in the tree. If you click **Remove File(s) from Tree** button or select the same option, all files will be removed. Therefore, ensure that you checked or cleared checkboxes of only required files.

View and Save Log

Log window shows details of the ongoing process. After scanning process, this pane shows information such as starting time and date of scanning process, name and size of selected files, and end time of scanning process.

After repairing process, this pane shows information such as starting time and date of repairing process, name and size of selected files, file status and end time of repairing process.

You can view log details in **Message log** pane at bottom of the application window as shown here:

You can save as well as clear information displayed in **Message log** pane.

To save log information

- In **Tools** menu, select **Save Log**. In **Browse For Folder** dialog box, specify destination where log file should be saved. Click **OK**.

To clear log information

- In **Tools** menu, select **Clear Log**.

To enable log window

- In **View** menu, select **Message log**.

FAQs

1. What does the demo version of the software do?

Demo version of the software is only for evaluation and shows preview of scanned PowerPoint files. To save repaired files you need to purchase and register the product.

2. Does the recovery software make changes to my original file?

No. **Stellar Phoenix PowerPoint Repair** produces a new repaired file on the destination location.

3. How to know whether the software will be able to recover my PowerPoint files or not?

To know whether the software will be able to recover your corrupt **PowerPoint** files or not, please try demo version of the software. Scan your files using **Stellar Phoenix PowerPoint Repair** and preview results for your satisfaction.

4. Is PowerPoint needed to be installed on the system for previewing PowerPoint files?

Yes, PowerPoint must be installed on the system to preview PowerPoint files.

5. Is PowerPoint needed to be installed on the system for repairing corrupt PowerPoint files?

Yes, PowerPoint must be installed on the system to recover data from corrupt/damaged PowerPoint file.

6. What is macro enabled(.pptm) file?

Macro-enabled version of a PowerPoint presentation allows you to automate certain tasks. When you open a PowerPoint Presentation (.ppt, .pptx), the PowerPoint software is launched, but the presentation doesn't start automatically. If you want the presentation to start immediately in full screen mode and provide a more polished and professional experience, you should save it as a PowerPoint Show or as a .pptm file.

7. How is .pptx file different from .ppt?

PowerPoint .pptx Presentations are different than the .ppt version in that they use the Microsoft Office Open XML format. The Open XML format makes it easy for other programs, such as

OpenOffice.org, to read .pptx files (and other Open XML file types). The Open XML format was introduced with Microsoft Office 2007.

8. Can I repair multiple PowerPoint files simultaneously?

Yes. To repair multiple files simultaneously, use **Select Folder** or **Find File(s)** option for adding files to the software. For full detail, please refer [Add Files](#) topic of this help manual.

9. If the location of PowerPoint files is not known, can I search for them using 'Stellar Phoenix PowerPoint Repair'?

Yes, **Find File** option of the software lets you search for PowerPoint files in specified drive of the computer. To know how to use this option, please refer [Find Files](#) topic of this help manual.

10. Does the software recover slides in the same order as they are in a PowerPoint file?

Yes.

11. What is Raw Recovery?

Raw recovery searches for signature of files. That means it recovers files based on signature. Raw Recovery should be used when results of normal recovery are not satisfactory. Raw Recovery may take more time but has greater chance to discover lost data. Raw Recovery option is available only for .ppt files.
