FAQs

1. **What does the demo version of the software do?**

    In demo version of **Stellar Outlook PST to MBOX Converter**, you will be able to view the complete mail body but cannot open attachments. To view / save all data and open attachments, you need to purchase and register the software.

2. **What is MBOX file format?**

    The MBOX file is the most common format for storing email messages on a hard drive. All the messages for each mailbox are stored as a single, long, text file in a string of concatenated e-mail messages, starting with the From header of the message.

    An MBOX is a text file containing an arbitrary number of e-mail messages. Each message consists of a postmark, followed by an e-mail message formatted according to RFC 822. The file format is line-oriented. Lines are separated by line feed characters (ASCII 10). A postmark line consists of the four characters From, followed by a space character, followed by the message's envelope sender address, followed by white space, and followed by a time stamp. The sender address is expected to be an addrspec as defined in appendix D of RFC 822.

    The date is expected to be formatted according to the syntax represented in the augmented Backus-Naur formalism used by RFC 822.

3. **What are the email clients that create MBOX file?**

    Program(s) that create .MBOX files are Thunderbird, Spicebird, Entourage, Pocomail, Eudora, AppleMail, Mulberry, SeaMonkey, Netscape, ClawsMail, OperaMail, MozillaMail, Evolution, and Sylpheed files.

4. **Can I convert a single mail into MBOX file?**

    You can only convert a complete mailbox.

5. **If the location of PST files are not known, can I search for then using Stellar Outlook PST to MBOX Converter?**

    Yes, Find File option of the software lets you search for MBOX files in specified drive of the computer. To know how to use this option, please refer Find PST Files topic of help manual.

6. **Can I convert multiple PST files simultaneously?**

    You can only convert a single PST file at a time.
