# Updating the Software

There are periodical software updates for **Stellar Phoenix Data Recovery for iPhone**. The software updates should be done to keep the software up-to-date. The updates can be a newly added functionality, a new feature, a new service or any other information that can be important for improvement. Update option in the application is capable of checking for the latest updates. This will check for both latest minor and major version available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs. Note that demo version can not be updated.

To update the application, follow the steps given below:

1. Click on **Update Wizard** button from the **Tools** menu bar. **Update Wizard** is displayed.
2. Click **Next**. A busy timer shows that updates are being searched. If it finds any new version, a message indicates the availability.
3. If a message is displayed that no updates are available, click **Cancel** to close the wizard.
4. Click **Next**. The software will start downloading the update files from the server. When the process is complete, the software will upgrade to the latest version.

# Recover from iPhone

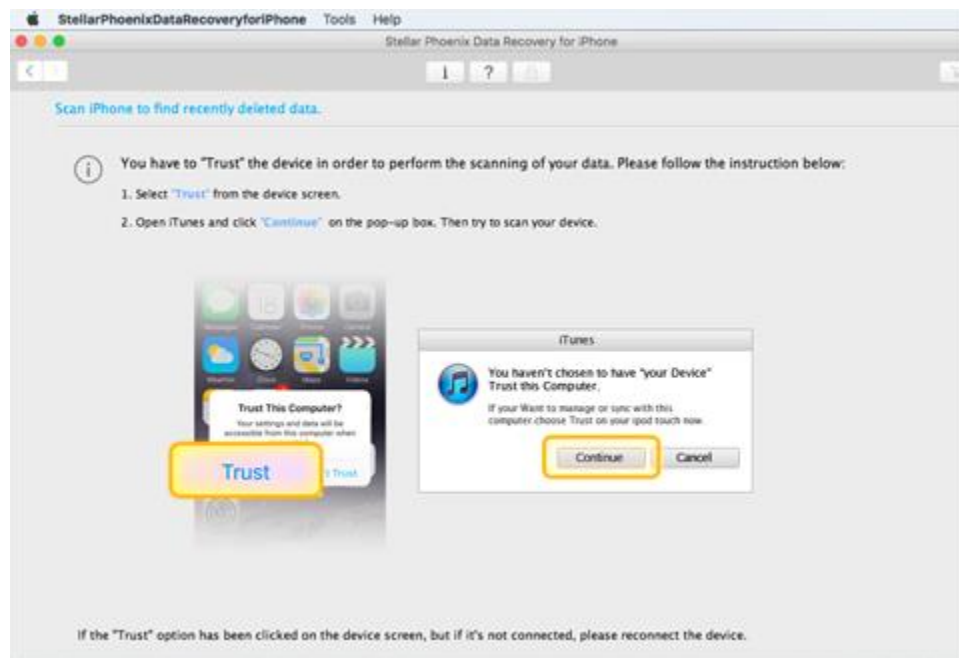

You can use the **Recover from iPhone** option to scan your iOS device and recover data (like contacts, messages, reminders, calendars, notes etc.) from it. This option will scan the iOS device directly to find data that was recently deleted or lost.

**Note:** Install iTunes before you use **Stellar Phoenix Data Recovery for iPhone** software. iTunes services should be running while you are scanning / analyzing an iOS device.

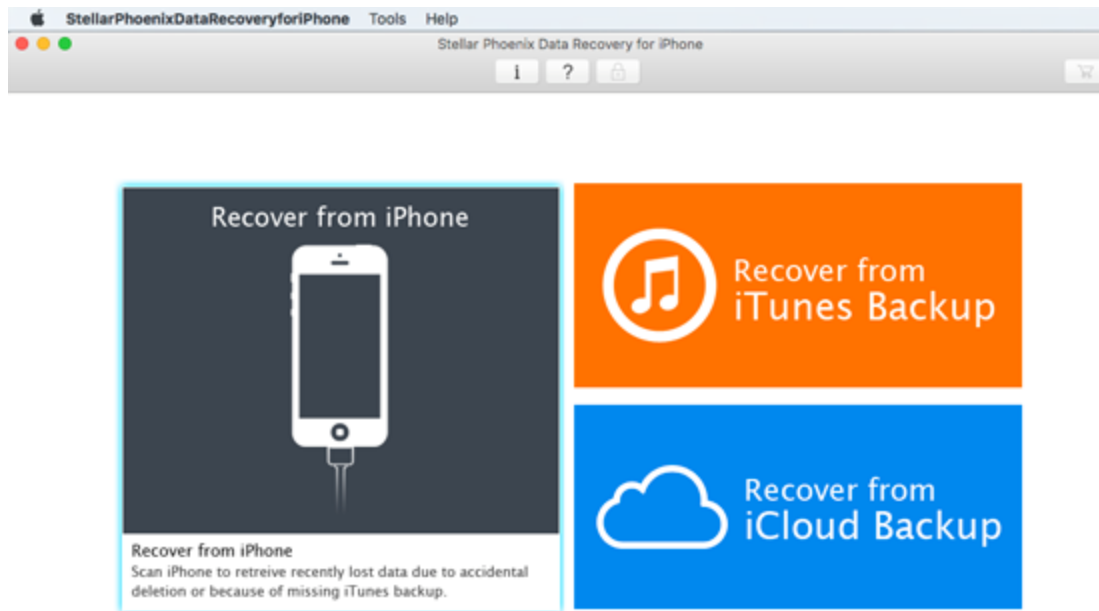

In order to use the **Scan Device** option of the software, follow the steps given below:

1. Plug your iOS device to your computer. Run **Stellar Phoenix Data Recovery for iPhone**.

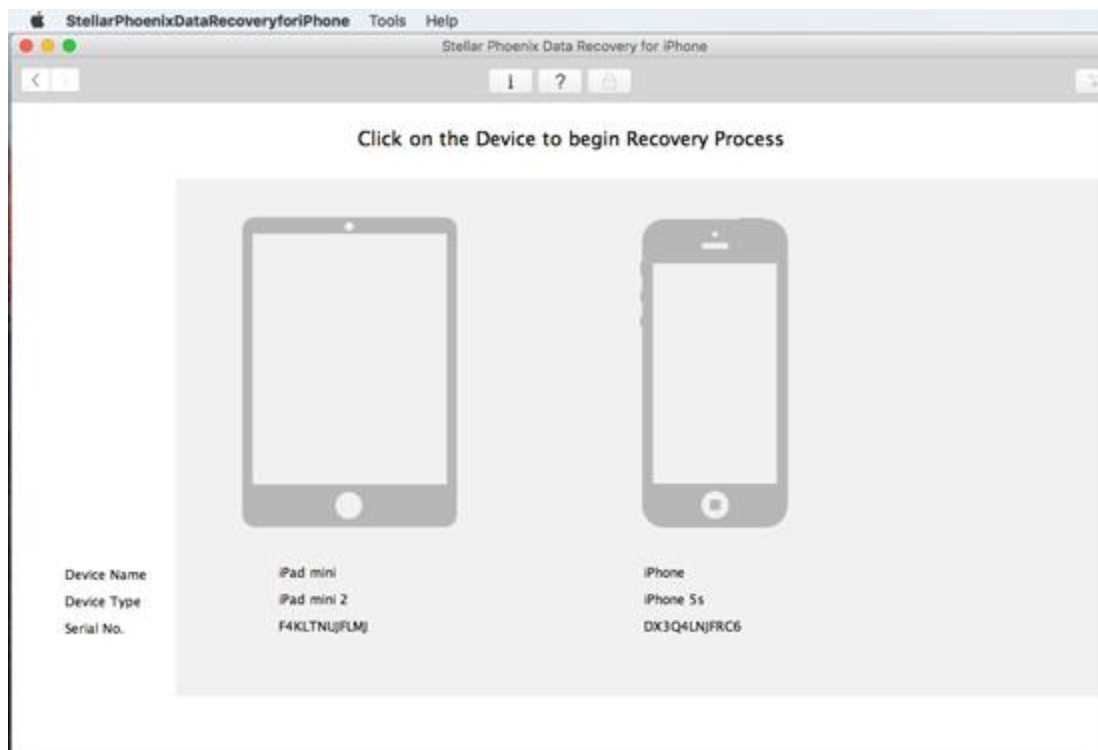

**Note:** After you connect the device, a **Trust/Untrust** dialog prompts in your device. You need to Trust a computer in order to enable sync and data transfer between the iPhone/iPad and the computer. If you tap on "Don't Trust", iTunes will not be able to recognize your device at all.

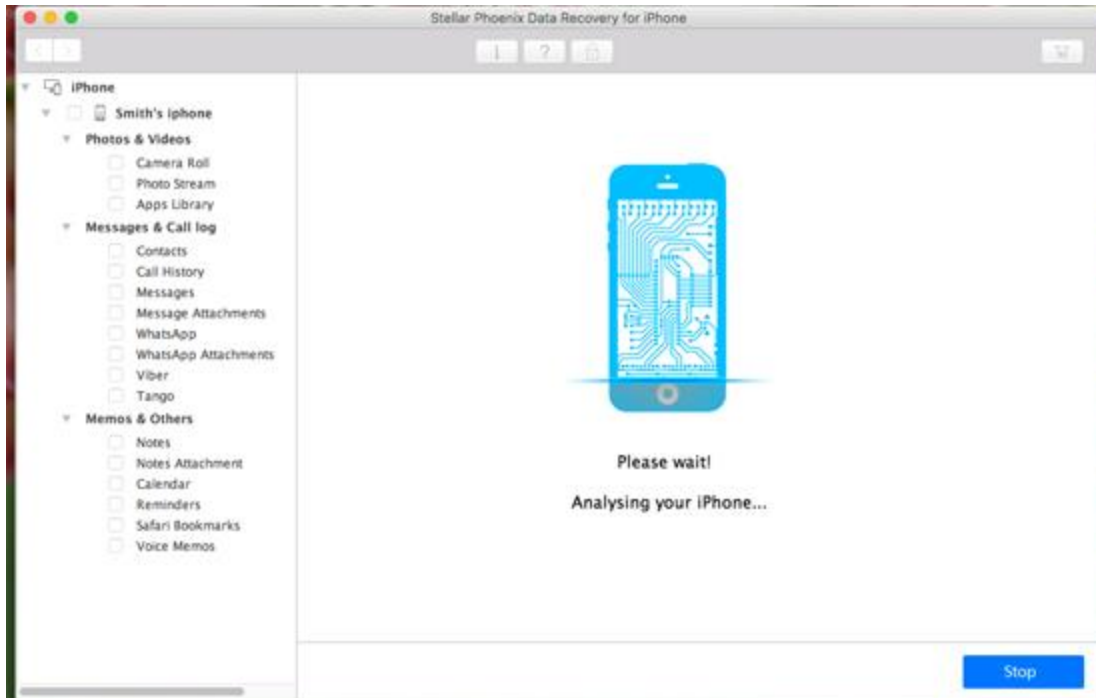

2. On **Stellar Phoenix Data Recovery for iPhone** main screen, select **Recover from iPhone** option.

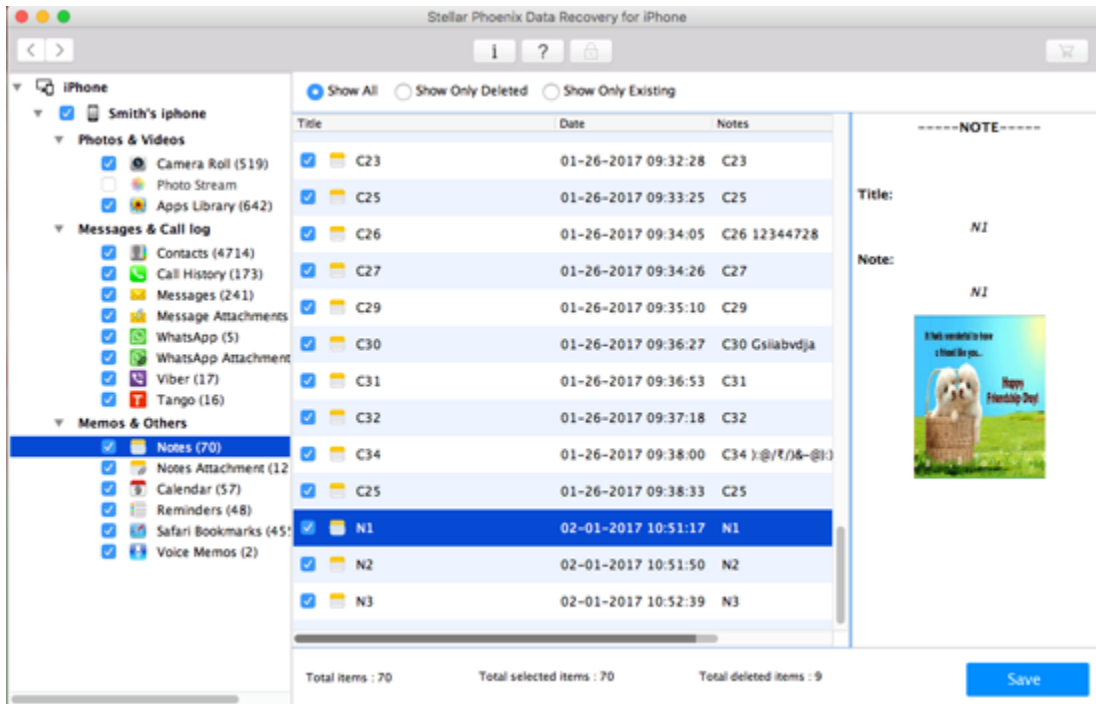

3. Application will start analyzing the device you have connected. In case you have connected multiple devices, application will list Device Name, Device Type and Serial Number of the connected devices. Select the desired device from which you want to recover the data.

4. After successful analysis, the application will begin scanning for contents of the device.

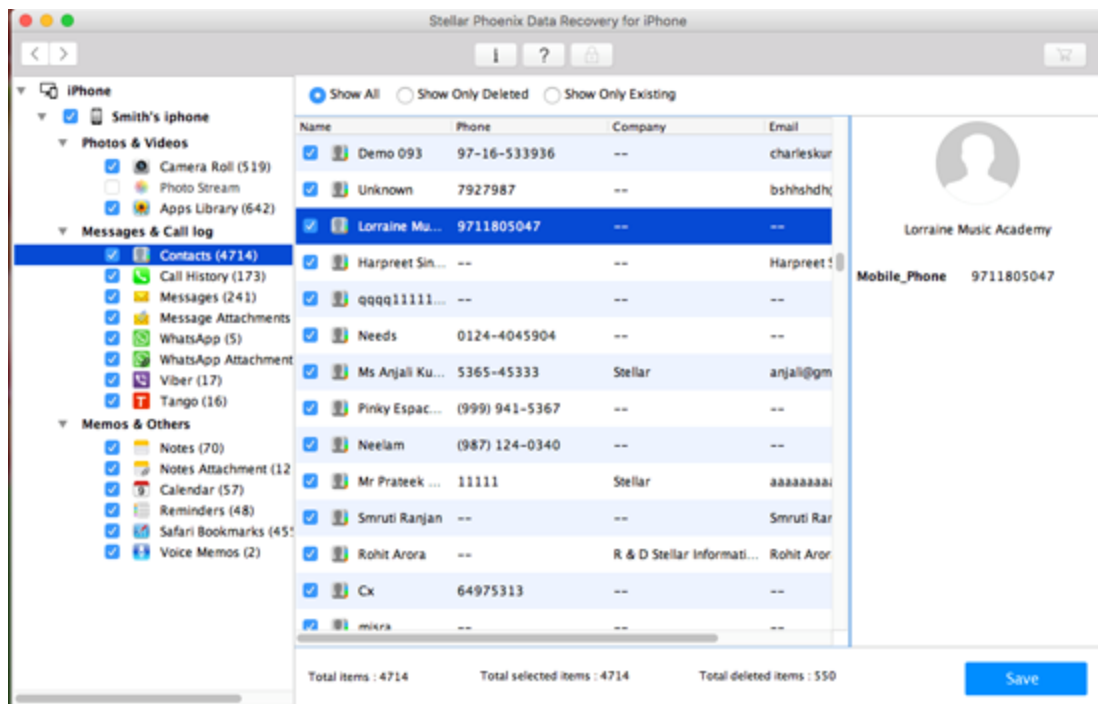

5. You can now preview and save the following supported files types:- Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call history, Calendar, Notes, Notes Attachments, Voice Memo, Reminder, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Apps Library, Tango and Viber.. From the left hand side tree view, click the supported file type under the listed iOS device. This will list all items under the selected supporting type head.

**Note:** All deleted items are listed in red whereas all others are black in color.

6. You can either select all or a few items (by selecting the check boxes in front of them).

**Note:** You can preview the existing and deleted items and you can also search for a specific item by typing a keyword in the search box.

7. Click **Save** to confirm it. Select a destination to save the recoverable data.

**Note:** You cannot recover deleted items from Camera Rolls, Photo Streams, Apps Library, Attachments and Voice Memos.

# Recover from iTunes Backup

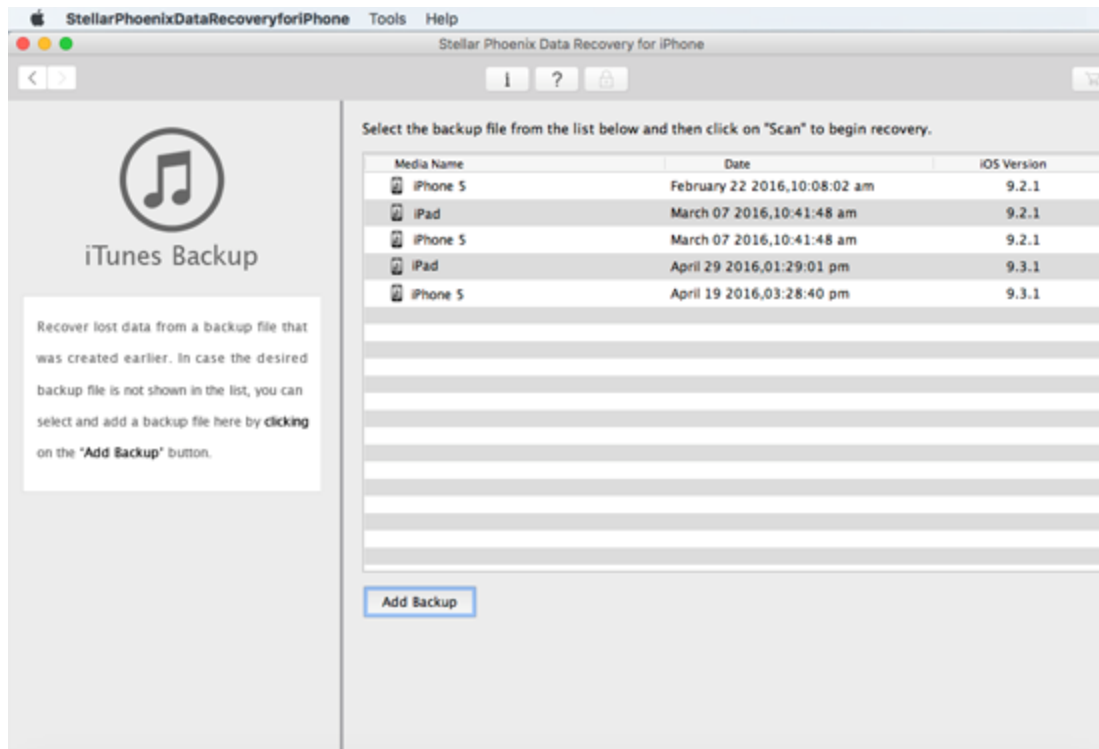

You can scan iTunes backup file for data if you have synchronized your iOS device with iTunes earlier. This is helpful in case you have lost your data. You can then recover the lost data from iTunes backup files using **Stellar Phoenix Data Recovery for iPhone** software.

In order to use the **Scan Backup** option of the software, follow the steps given below:

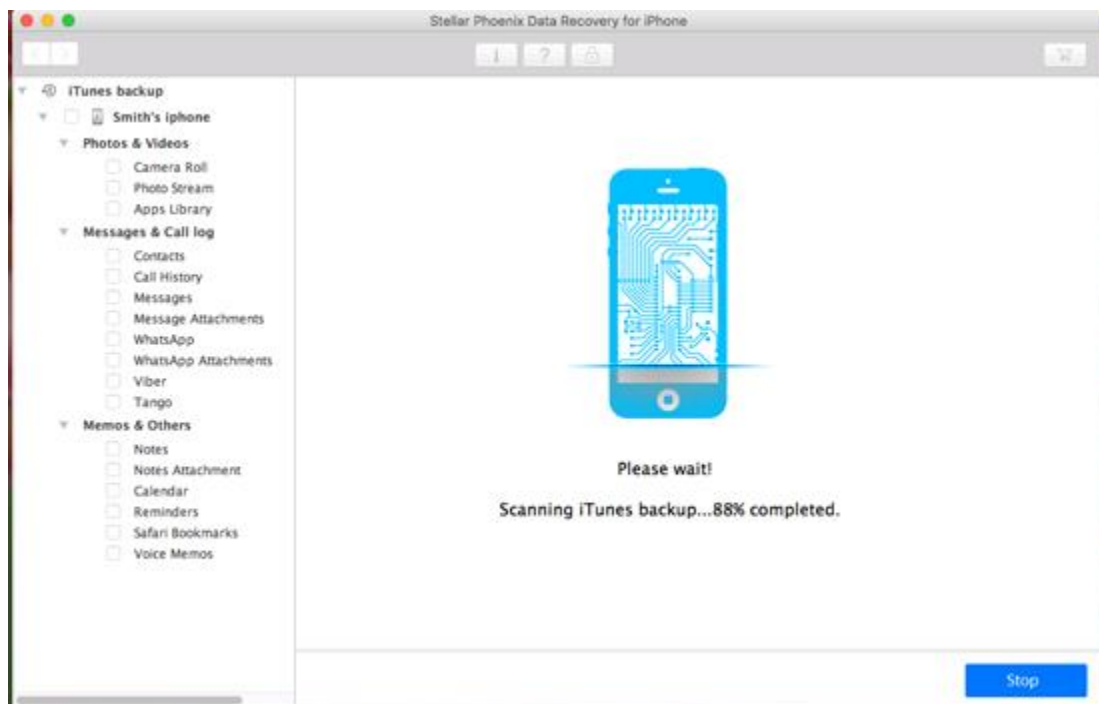

1. Run **Stellar Phoenix Data Recovery for iPhone**. (**Note:** You do not need to connect your iOS device for recovering data from iTunes backup files)
2. On **Stellar Phoenix Data Recovery for iPhone** main screen, select **Recover from iTunes Backup** option.

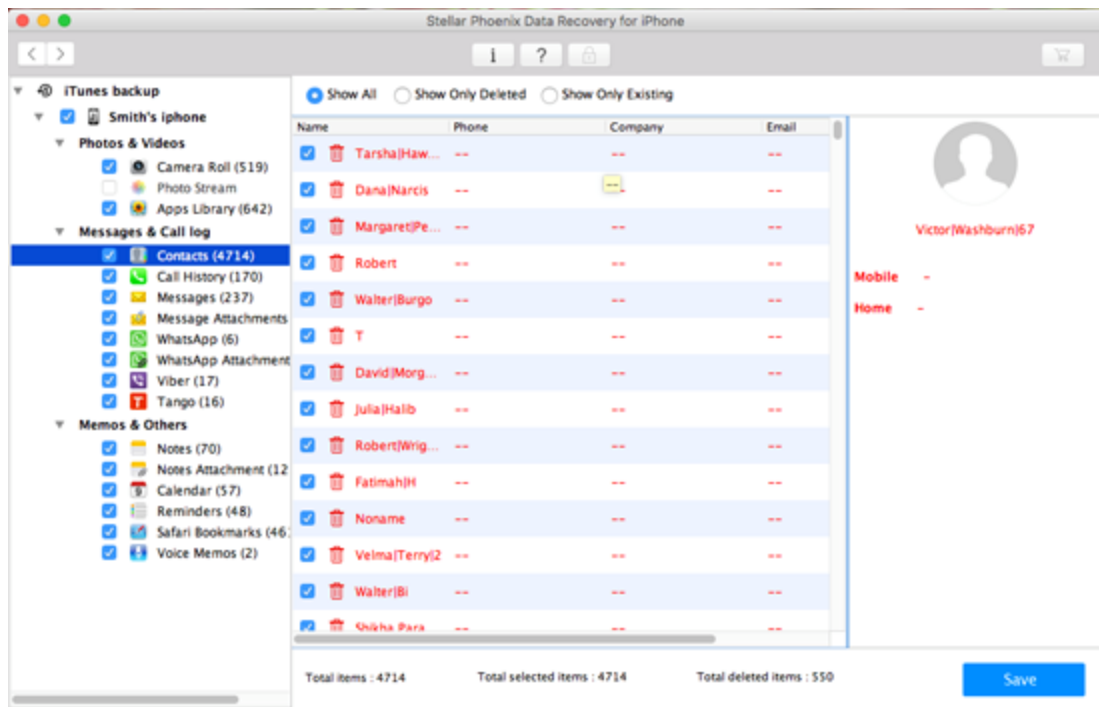

3. Application will list all the iTunes backup files listed in your systems.

- Select an iTunes backup from which you want to preview and save the following data from:- Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call history, Calendar, Notes, Notes Attachments, Reminder, Voice Memo, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Apps Library, Tango and Viber. (**Note:** All deleted items are listed in red whereas all others are black in color.)

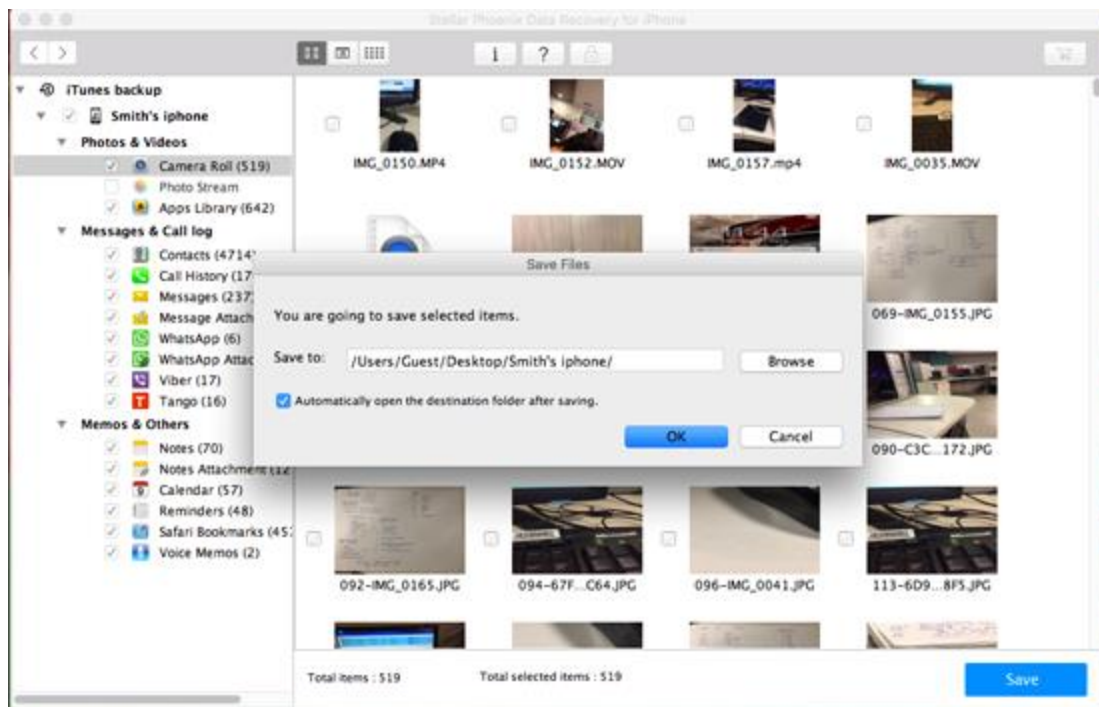

- From the tree view, click on the supported file categories under the listed iTunes backup file. This will list all items under the selected category head.

- You can either select all or a few items (by selecting the check boxes in front of them).

**Note:** You can preview the existing and deleted items and you can also search for a specific item by typing a keyword in the search box.

- Click **Save** to confirm it. Select a destination to save the data.

**Note:** In **Stellar Phoenix Data Recovery for iPhone** you have an option of manually adding the backup file from your system using the **Add Backup** option. You need to click **Add Backup** option and then browse to the iTunes backup location, select it and then click **OK**.

# Recover from iCloud Backup

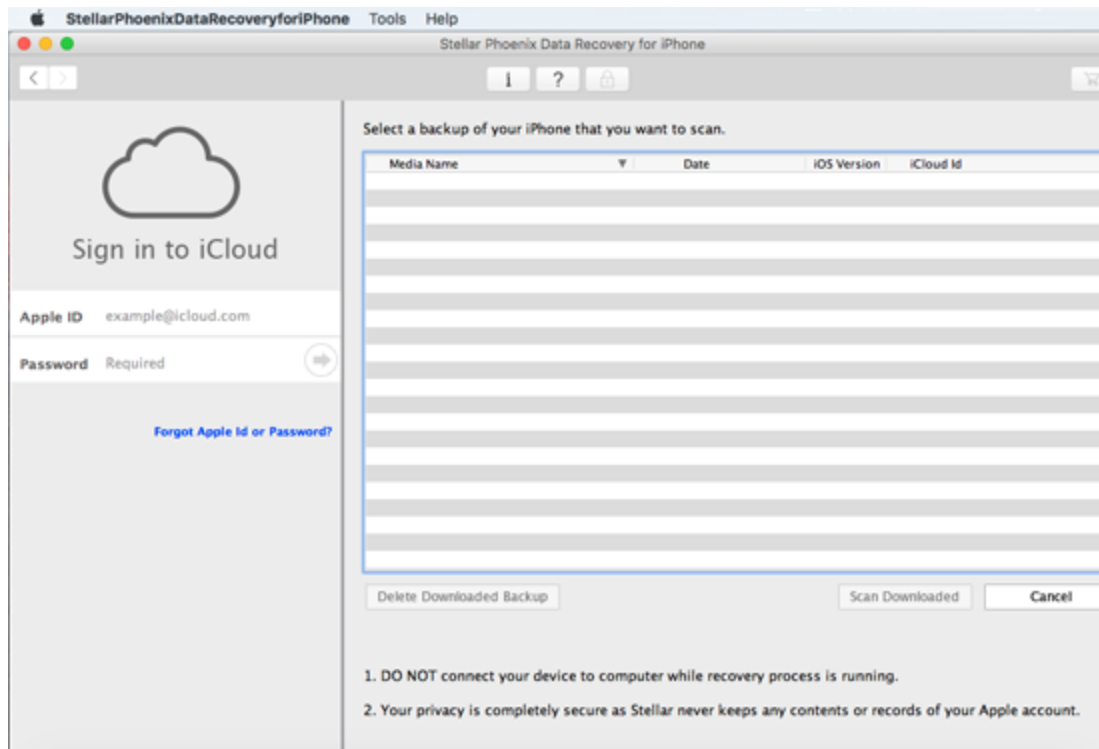

You can scan iCloud backup file for data if you have synchronized your iOS device with iCloud earlier. To restore or recover your lost files from iCloud backup, you need **Stellar Phoenix Data Recovery for iPhone** to help you.

In order to use the iCloud **Backup** option of the software, follow the steps given below:

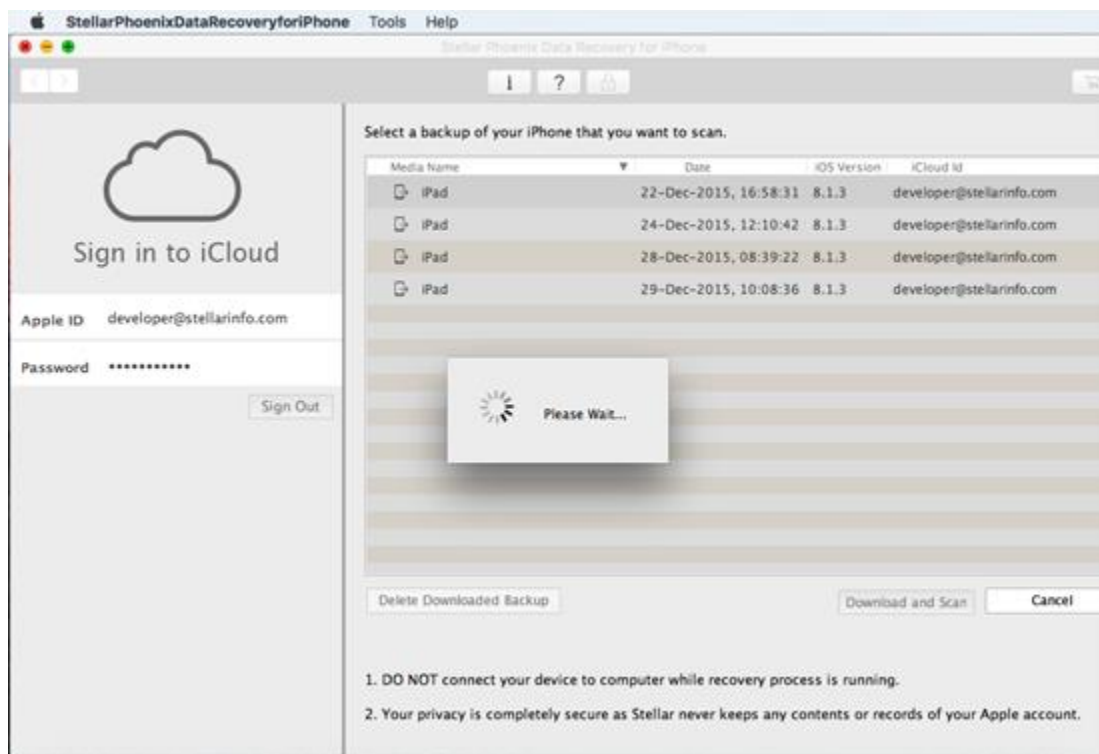

1. Run **Stellar Phoenix Data Recovery for iPhone**. (**Note:** You do not need to connect your iOS device for recovering data from iCloud backup files)
2. On **Stellar Phoenix Data Recovery for iPhone** main screen, select **Recover from iCloud Backup** option.

3. Enter the **Apple ID** and **Password** in order to get list of all available backup files from iCloud.

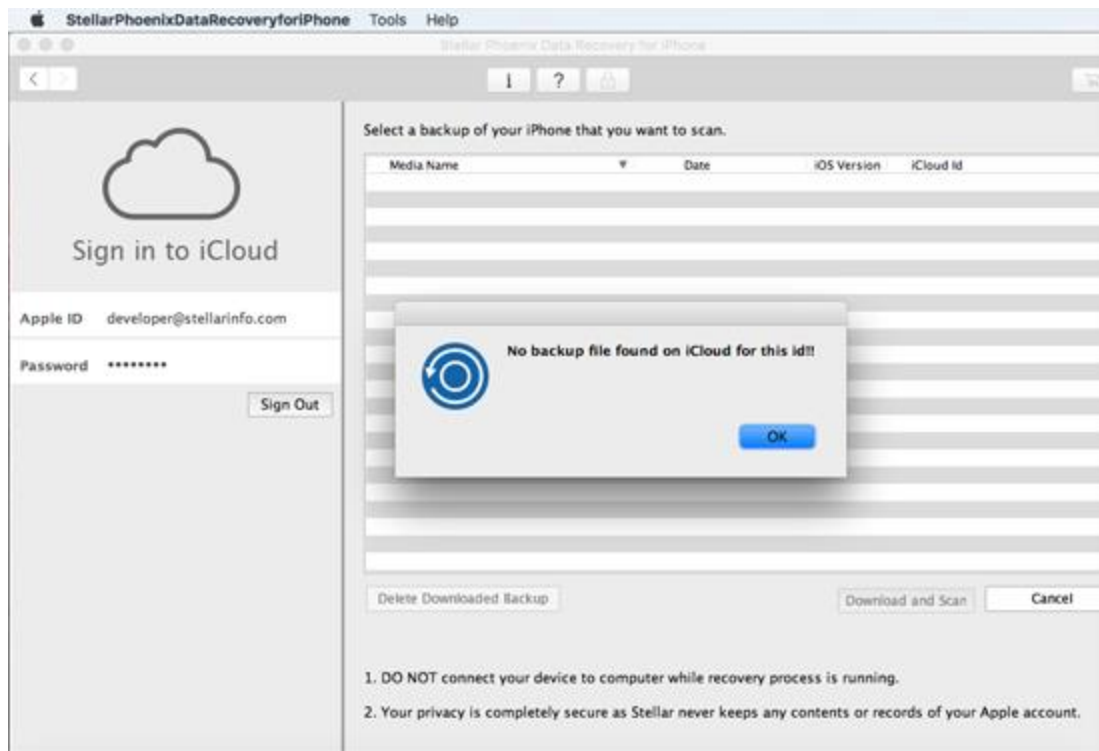

4. Scan and Download the iCloud backup files.

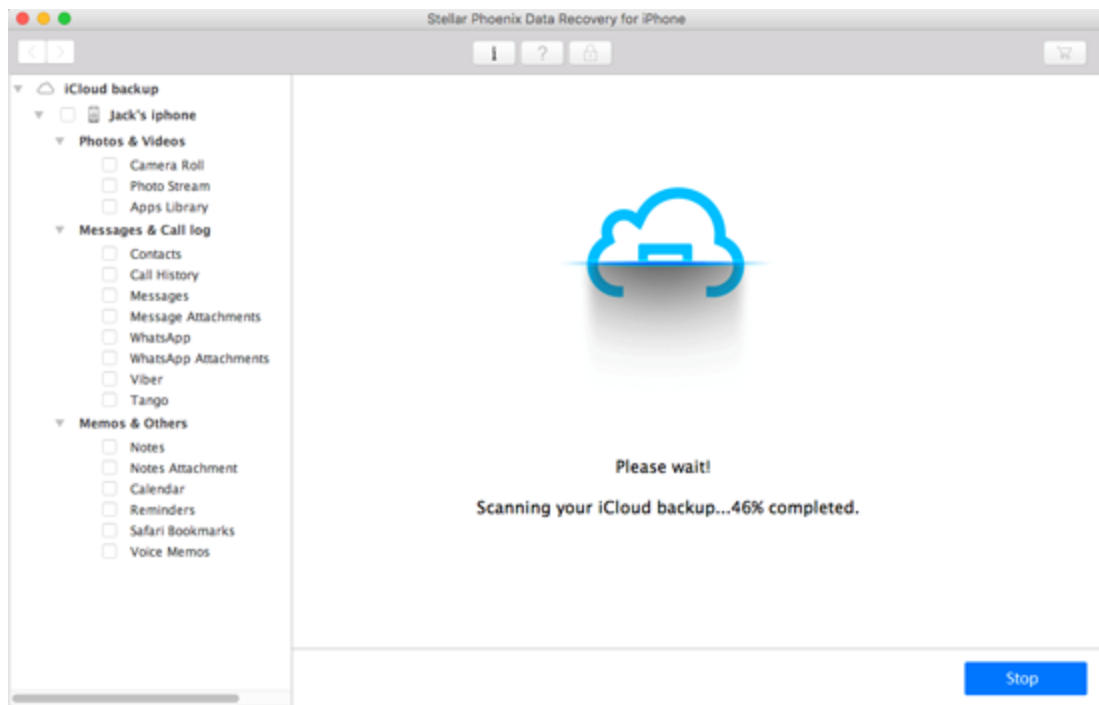

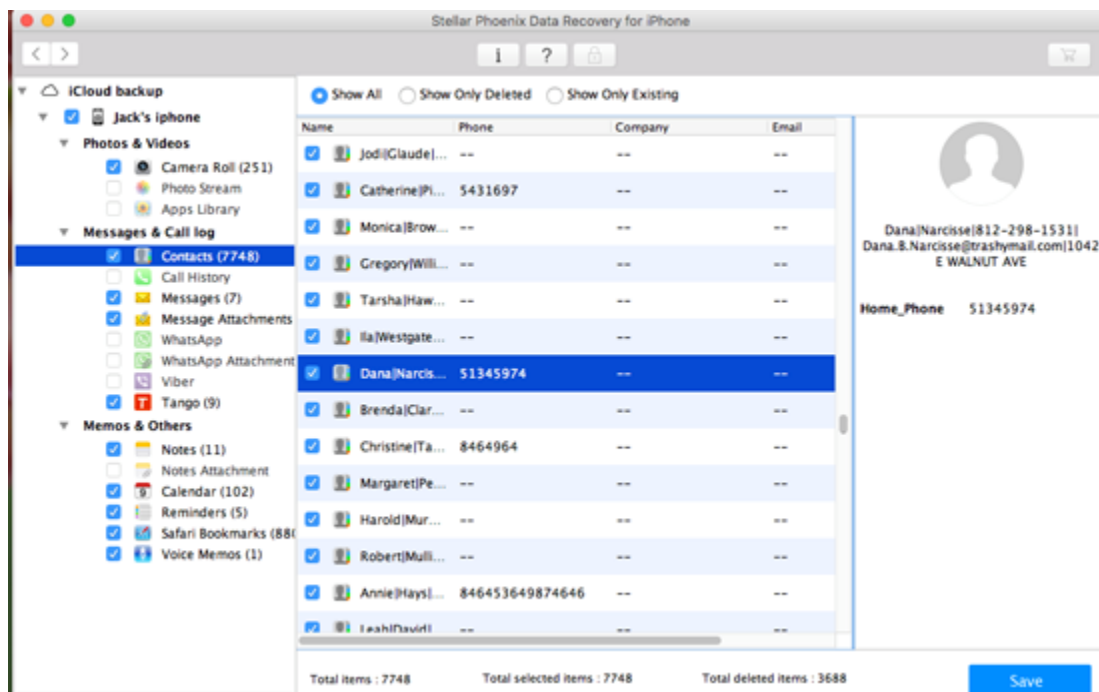

**Note:** In case you do not have any backup with the account entered, the dialog box shown below appears.

5. Select any iCloud backup from which you want to preview and save the following data from:- Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call History, Calendar, Notes, Notes Attachments, Reminders, Voice Memos, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Apps Library, Tango and Viber.

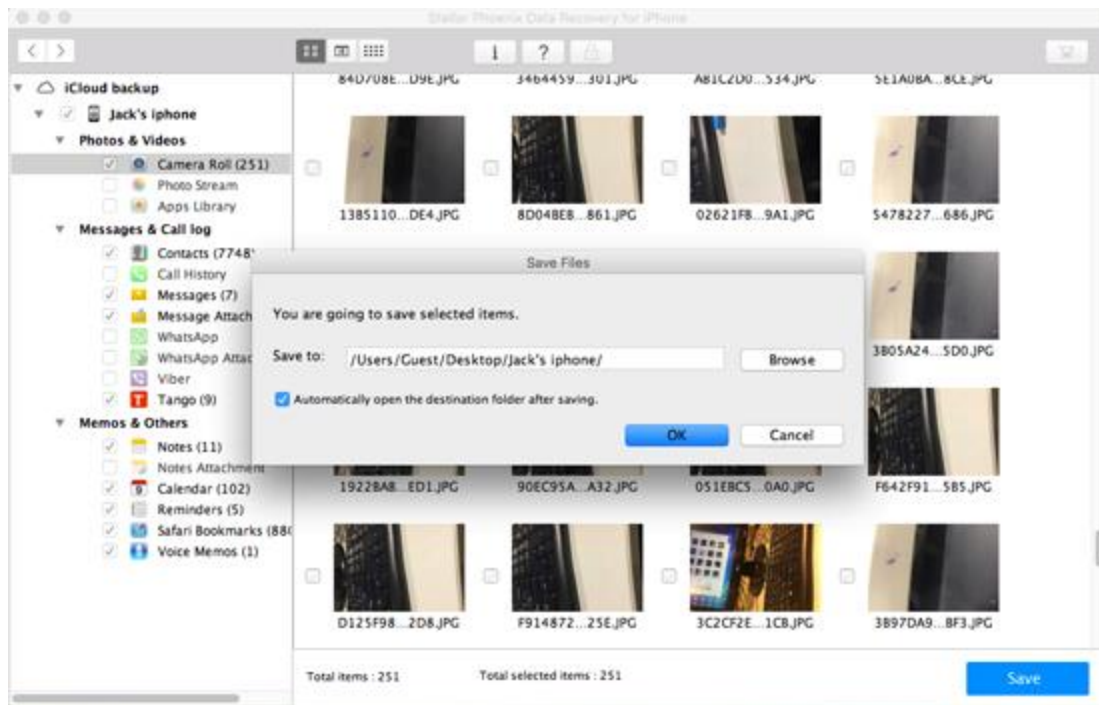

6. From the tree view, click on the supported file categories under the listed iCloud backup file. This will list all items under the selected category head.
7. You can either select all or a few items (by selecting the check boxes in front of them).

Note: You can preview the existing and deleted items and you can also search for a specific item by typing a keyword in the search box.

8. Click **Save** to confirm it. Select a destination to save the data.
